@ 1970-71 STANDS FOR CALENDAR YEAR 1971 AND SO ON

N. D. KUNDU

CSO. NO. 143/6.79

PREFACE

The current issue which is the 23rd in the new series of the Abstract relates to 1978 and incorporates the latest available data under important heads of economic and social development. It gives national aggregates for 1950-51, 1955-56, 1960-61, 1965-66, 1970-71 and for each subsequent year upto 1977-78. Statewise information is presented for the latest year.

- 2. A review of the subject coverage of the Statistical Abstract is made regularly with a view to introducing improvements in the light of the latest developments and the availability of fresh data. Changes effected in the tables in the current issue as compared with the previous issue are given at page (ix).
- 3. The Statistical Abstract serves as an important source material for authentic data on different sectors of the Indian economy. The primary agencies are indicated at the foot of each table. The relevant publications of these agencies furnish more detailed information on the subjects concerning them. In some cases, advance data are provided by the source agencies for incorporation in the Abstract.
- 4. The continued and generous cooperation given by various offices of Central Government, State Governments and Public Bodies in making available the required data for the Abstract is gratefully acknowledged. Suggestions made for improvement of the Abstract by users are also acknowledged with gratitude.

B. Changes effected in the Tables in the Current Issue (1978) as compared with the Previous issue (1977)

Sl. No.	Table No. in the previous issue (1977)	Table N in the current issue (1978)	Description
1	79	78	Data for financial year 1976-77 onwards has been furnished as per revised classification of countries by economic regions.
2	89	8 8	'External assistance—authorisation & utilisation' has been modified to include/incorporate OPEC countries.
3	1 6 8	167 & 168	National Product at factor cost s earlier consolidated table, has been split into two tables—one 'at current prices' and the other "at 1970-71 prices".
4	17 3	175	Domestic Capital Formation by Type of Assetshas been given at 1970-71 prices in place of 1960-61 Prices.
5	225 & 226	227	Tables 225 & 226 of the previous issue (1977) have been merged in Table 227 of the current issue (1978).

C. TABLES ADDED IN THE CURRENT ISSUE (1978)

Sl. No.	Table No. in the current issue (1978)	Description
1	171	Private Final Consumption Expenditure (at Current Prices)
2	172	Private Final Consumption Expenditure (at 1970-71 Prices)

D. TABLE DELETED FROM THE CURRENT ISSUE (1978)—AS COMPARED WITH THE PREVIOUS ISSUE (1977)

SI. No.	Table No. in the previous issue (1977)	Description
1	72	Particulars relating to fire, marine and miscellaneous insurance business of non-Indian insurers.

This section includes abstract of available data on area and population of the Indian Union based on the Census of population 1971.

Table 1

This table contains data on area, total population and its classification according to sex and urban and rural population. Urban area is defined as follows:

- (a) All places with a municipality, corporation or cantonment or notified town area.
- (b) All other places which satisfy the following criteria:
 - (i) a minimum population of 5,000.
 - (ii) at least 75 percent of male working population is non-agricultural.
 - (iii) a density of population of at least 400 per sq. km.

In the case of Jammu and Kashmir, the population figures exclude information for area under unlawful occupation of Pakistan and China where census could not be taken.

Table 2

This table shows the district-wise break-up of area (provisional) and population of States and Union Territories according to 1971 Census. This also gives district-wise details of population regarding male, female, total and percentage increase of population since 1961 and proportion of Rural/Urban population to 1,000 total population.

Table 3

This table shows the number and population of towns in India by classes (I-VI). Towns are classified according to population as below:

Class I - over one lakh

Class II - 50,000 to 99,999

Class III - 20,000 to 49,999

Class IV - 10,000 to 19,999

Class V - 5,000 to 9,999

Class VI - Under 5,000.

Table 4

This table shows the sex-wise population of cities (with population over one lakh) in each State in 1971 along with increase over the 1961 Census.

Table 5

This table gives State-wise population enumerated in eight censuses from 1901 to 1971 alongwith the decennial percentage variations.

Table 6

This table gives State-wise percentage distribution of population and area according to population density.

Table 7

This table shows the rankings of the States and Union Territories in order of population and area.

Table 8

This table presents the economic classification of the population.

Table 9

Expectation of male and female lives at birth and at ages 10,20,30, 40, 50,and 60 years in the census years 1881-1971 for all India is shown in this table.

2-174 C.S.O./ND/79.

Table 10

This table shows the population according to numerically important religious communities of India—Hindus, Muslims, Christians, Sikhs, Buddhists, and Jains with the percentage increase during 1961-71. Other religions have been collectively presented under others'.

Table 11

The figures represent the population and percentage distribution of members of scheduled castes and scheduled tribes in States and Union Territories.

Table 12

This table shows State-wise provisional estimated mid-year population for the years 1961, 1966 and 1969 to 1978. The estimates have been made by the Expert Committee on Population pections with the Registrar General, India, as Chairman. These estimates have been made after taking into account the 1971 Census count of population.

⁽¹⁾ The figures are provisional and are as on 1-7-1971. These are computed by the Surveyor General of India and cleared by the Central Statistical Organisation.

⁽a) The population figures exclude population of areas under unlawful occupation of Pakistan and China, where Census could not be taken.

⁽a) As on 1-1-1966.

⁽b) Includes area under unlawful occupation of Pakistan and Cline.

2. CLIMATE

The meteorological data such as temperature, pressure, rainfall, etc. are recorded by the Indian Meteorological Department at about 450 observatories. In addition to this, there are about 4400 rain recording stations maintained by different State Governments, the data of which are published by the respective State Governments.

Rainfall is recorded at 0830 hours-I.S.T. everyday throughout the country. The amount measured gives the rainfall of the previous 24 hours.

This section gives the normal and actual rainfall data with reference to meteorological sub-divisions indicated against each. Two types of rainfall figures have been given, one based on all available rainfall data for both observatory and State rain-gauge stations, and the other based on available observatory stations only, denoted by (a). This has been done because there is a considerable lag in receipt of rainfall data from the States, and the sub-divisional 'means' worked out based on observatory data only are given so as to provide the information provisionally.

Tables: 13 & 14.

Table 13 presents sub-division-wise actual and normal monthly rainfall during the year 1977.

Table 14 provides similar actual annual minfall data for the years 1951, 1956, 1961, 1966 ard 1970-1977.

⁽b) Refers to sub-divisional set up as in 1976.

⁽c) Starting 1976 Includes Sikkim.

3. AGRICULTURE

This section contains tables regarding pattern of land utilisation, area, production and yield per hectare of principal crops in India. The section also contains a table each on index numbers of agricultural production and agricultural implements and machinery. The source for these data is the Ministry of Agriculture & Irrigation. Primary data are, however, collected by the Agriculture Ministry from individual State authorities.

Table 15-

REPORTED AREA

This table presents data regarding area classified by categories of land utilisation which are explained below.

Reporting Area is the area for which information on 'land use by classification of area' is avaiable. Generally land utilisation figures are based on the returns prepared by the village staff for revenue purposes.

Area under 'forests' includes area actually forested or lands classed or administered as forests under any legal enactment dealing with forests whether State-owned or private and whether wooded or maintained as potential forest land. The area of crops raised in the forests and grazing lands of areas open for grazing within the forests are also included under the forests area.

Figures of forest area shown in the table are taken from 'Indian Agricultural Statistics' brought out annually by the Directorate of Economics and Statistics, Ministry of Agriculture. The figures in this table do not tally with the corresponding figures of area given in forest section because of the following reasons: (i) The figures presented in the 'Agricultural Statistics' generally relate to the agricultural year (July-June) whereas those on the 'Indian Forest Statistics' generally relate to the financial year (April-March); (ii) In the Indian Forest Statistics Returns, the whole area including 'non-wooded' under the control of Forest Departments, is taken as area under forests while in Agricultural Statistics it is classified according to its actual utilisation & (iii) Forest Department Reports are expected to cover all forests area in the state but Agricultural Statistics relate only to the 'reporting areas'.

Area not available for cultivation is the land which is absolutely barren or uncultivable or covered by buildings, water, roads, railways, mountains, deserts or otherwise appropriated for non-agricultural purposes.

Other uncultivated land excluding current fallows, include the following categories:

- (i) Permanent passures and other grazing lands which cover all grazing lands whether they are permanent pastures and meadows or not and village common grazing lands.
- (ii) Land trider miscellaneous tree crops and groves not included in the net area sown which includes all cultiva ble land, not included under area sown but put to some agricultural use. Land under casuarina trees and others groves for fuel, etc. which are not included under orchards, are also included in this category.
- (iii) Culturable waste land which includes all lands available for cultivation but not taken up for cultivation or taken up for cultivation once but not cultivated during the year and the last five years or more in succession.

Fallow land implies all lands which were taken up for cultivation but are temporarily out of cultivation for a period of not less than one year and not more than five years. "Fallow land" has been split up in to (i) "Current fallow land"; and (ii) "other fallow land". Lands lying fallow for a period of one year, are included under "Current fallows", those lying fallow for more than one year but less than five years, are included under "other fallow land" while those fallow beyond a period of five years, are included under "culturable wastes" or under "miscellaneous tree crops and groves" (not included under net area sown) as the case may be.

Net area sown, area sown more than once and total cropped area.—In computing the aggregate net area sown, area sown more than once has been counted only once. However, while calculating the total cropped area, if different crops are raised in a year on a given land, the same area is accounted more than once.

Tables 16 and 17-

Figures are given for area and yield of 31 principal crops in table 16 and 17 respectively. Regular all-India forecasts are issued in regard to most of these crops viz., all foodgrains, oilseeds, fibres, potatoes, sugarcane, ginger, black pepper, chillies and tobacco. The estimates of area and production of coffee tea and rubber are based on special returns received from the State Governments in connection with the all India publications on these crops. For some recent years, however, in the absence of necessary data from the State Govts., figures as available from Coffee Board, Tea Board, & Rubber Board have been provisionally adopted.

The data relate to crop year ending June unless otherwise stated. Figures for the latest year are the final forecasts while those for the years 1970-71 to 1976-77 are partially revised estimates as issued from time to time along with final forecasts. Figures for earlier years are fully revised estimates.

The variation in coverage and changes in methods of estimation have introduced some incomparability over time. The changes in coverage (area) since 1949-50 do not substantially affect comparability but improvements in the methods of estimating yield rates and total production were introduced mainly after 1949-50.

Table 18-

This table presents data regarding average yields of principal crops in quintals per hectare. Average yields per hectare of principal crops have been obtained by dividing the total production by the corresponding total area under each crop. All India and State average yield per hectare has generally been calculated on the basis of area and production figures rounded up to hundreds in the case of forecast crops. In the case of tea, coffee, rubber and minor crops average yield has been calculated on the basis of area and production figures upto the unit place. In the case of coffee yields per hectare relate to plucked area and in the case of rubber to tapped area.

Table 19-

This table shows the index of agricultural production in India on base: Crop years—triennium ending 1969-70=100. The index covers 42 crops divided into two main groups and 8 sub-groups. Weights have been assigned to different crop indices in proportion to the total value of production of each crop during the base periods. The output has been evaluated at annual barvest prices prevailing during the year. In a few cases where reliable harvest prices were not available, average wholesale prices during the past harvest period have been used with appropriate adjustment, weights allotted to each crop are mentioned in the table. During recent years a number of additional crops have been covered under the system of crop estimation. The coverage of the all India series has thus been enlarged by including these additional crops viz. fruits and vegetables, turmeric & arecanuts, guard seed etc. These 42 crops now account for nearly 96% of total gross cropped area in the country.

The change over during the last decade or so from the traditional method of reporting area and production of crops to the method of complete enumeration in the case of area and to crop estimation survey for estimation of yield rates and also increase in reporting area, have taken place progressively in respect of different crops in different states. To provide for these change in coverage and methods of estimation, the index numbers of agricultural production are constructed by the chain-base method under which the production of a crop during a year is expressed as a relative of the same corresponding production in the preceding year, based on the same coverage and methods of estimation. These relatives for each crop are linked to the base year through the intervening chain relatives to give the product on index for the crop.

The application of chain-base method involves two assumptions which are

- (i) The variation in production in the non-reporting areas is the same as that in the reporting areas in the aggregate; and
- (ii) the relative variation in the figures of production based on crop-estimation surveys is the same as that based on the traditional method of crop estimation employing eye-appraisal and normal yield figures.

The practical implications of (ii) above are that for the transitional year, that is, when the method of estimation undergoes a change the estimates of production should be available on the basis of both the traditional method and the crop-estimation surveys.

Index of Agricultural Production

where an = area under the ith crop in the jth year.

aio= area under the ith crop in the base period.

yil= yield per hectare of the ith crop in the jth year.

yio= yield per hectare of the ith crop in the base period.

pio= price per unit of the ith crop in the base period.

Pti= production of the ith crop in the jth year.

pio= production of the ith crop in the base period.

Table 20-

This table gives an account of agricultural implements and machinery in actual use as recorded in the quinquennial livestock censuses. Statewise details are also given for the livestock census year 1972.

⁽¹⁾ In million nuts.

^(*) Data relate to Cane and not Gur.

⁽⁸⁾ Relate to cale day year i.e. data against 1950-51 relate to the year 1950 and so on.

⁽a) Less than 500 tonnes.

4. LIVESTOCK AND FISHERIES

This section contains tables regarding livestock, and fisheries. Data regarding the number of livestock and poultry, besides agricultural implements (shown separately under Agriculture), are collected through a census conducted quinquennially. In the rural areas, primary data are collected through the village revenue agencies where they exist and through other local staff, where they do not. In the urban areas, staff of the municipal or notified area committee, collect the information. The data are compiled by the Department of Agriculture, Veterinary or Land revenue, as the case may be, in the different States, and consolidated returns showing districtwise details are furnished to the Directorate of Economics and Statistics, Ministry of Agriculture & Irrigation. The 11th Livestock Census which was to have been organised in the year 1971 was deferred and was carried out in most of the states with 15th April, 1972 as the reference date. The reference date in case of Jammu & Kashmir, Karnataka and Meghalaya was 15th November, 1972 and in the case of Himachal Pradesh and Tamil Nadu 30th September, 1972 and 1st March, 1974 respectively.

Tables 21-22:

Table 21 provides data regarding number of livestock by category of livestock. This also shows the number of poultry. Table 22 presents number of male and female cattle and buffaloes used for work only. Working cattle include bulls and cows and working buffaloes include male and female buffaloes over 3 years and kept for work only.

Tables 23-24:

These tables give the production of milk and estimates of raw wool production in India.

Tables 25-26:

Table 25 presents data regarding fish catch and landings by groups and species. Table 26 provides data regarding quantity of fish catch by disposition.

5. FOREST

This section contains tables on area under forest by type, major and minor forest produce and revenue and expenditure and progress of forest regeneration and afforestation. The main sources for these data are the Forest Departments of various States and Union Territories, who supply data to the Ministry of Agriculture & Irrigation for their publication "Forestry in India".

Table 27 1

This table presents area under forest, classified by types as described below 1

- (i) Composition, namely coniferous (soft-wood) and non-coniferous (broad leaved). Coniferous forest is one in which 80 per cent or more of the volume is coniferous species and non-coniferous (broad leaved) forest is one in which 80 per cent or more of the volume is of non-coniferous species, both hard and soft.
- (ii) Functions, namely merchantable and non-merchantable. Forests which are within the reach of economic management or exploitation as sources of forest products including immature forests and managed forests where fellings are prohibited, are known as merchantable forest and forests which are not yet managed or exploited owing to inaccessibility or on account of forest produce in them being unsaleable are known as non-merchantable forests (or inaccessible and unprofitable forests).
- (iii) Legal Status such as "reserved", "protected" and "unclassed". Reserved forest is one which is permanently dedicated either to the production of timber or other forest produce and in which right of grazing and cultivation is seldom allowed. In protected forests, these rights are allowed subject to a few mild restrictions. Unclassed forests occur mostly in Madhya Pradesh, Assam, Bihar and Maharashtra and consist largely of inaccessible forest or unoccupied waste; and
- (iv) Ownership, namely area owned by (a) Forest Department (b) Civil authorities; (c) Corporate bodies; and (d) Private individuals.

Table 28 1]

This table provides data relating to forest produce classified as major and minor produce. The column 'others' under minor produce includes fibres and flosses, vegetable oils and oilseeds, Bidi leaves and other minor produce. Figures of quantity along with total value are shown in the case of the former and value only in the case of the latter.

Table 29 1

This table gives gross and net revenue from and expenditure on forests.

Table 30:

This table provides data relating to area of forest protected from fire and cattle. The figures relating to "total area of all forests under Forest Department" given in this table are inclusive of other forest area which is also controlled by the Forest Department.

Table 31 :

This table shows the figures relating to area of existing forests regenerated and of area afforested. This also presents the figures of the total cost of regeneration and afforestation.

6. SERICULTURE

Table 32:

Available data relating to sericulture, which are restricted to the production of rawsilk and silk yarn, have been collected by the Central Silk Board, with the co-operation of Sericult ure Departments in the States and are presented in these tables.

Raw silk is of two kinds, viz., mulberry and non-mulberry. The distinction arises from the rearing of silk-worms upon either mulberry leaves or other plants. Mulberry silk is produced mainly in Karnataka, West Bengal, Jammu & Kashmir, Assam, Punjab and Tamil Nadu although some other States have made some progress in this direction under their development plans. Non-mulberry silk comprising Tasar, Eri and Muga is produced in Assam, Bihar, Madhya Pradesh, Orissa, Manipur and West Bengal.

The different types of mulberry and non-mulberry silk and spun silk and noil yarn are further defined as follows:

Filature Silk.—It is silk reeled in factory-type units from cocoons of silkworms fed on mulberry leaves employing steamfor heating and power for driving the reels. There are filature establishments in the States of Karnataka, Jammu and Kashmir, West Bengal and Uttar Pradesh.

Cottage Basin Silk.—Cottage basin silk is the silk recled on 'Cottage basin' from coccers of silk worms fed on mulberry leaves. The 'Cottage basin' is an improved recling equipment superior to Charka and has modern mechanical gadgets capable of yielding better quality raw silk as compared to Charka silk.

Charka Silk.—It is silk reeled in cottage establishments from cocoons of silkworms fed on mulberry leaves. At present bulk production of mulberry silk is reeled on 'Charkas'. Besides, there are different types of 'Charkas' used for reeling non-mulberry silk.

Dupion Silk.—Coarse uneven silk reeled from double cocoons which are cocoons spun by two silkworms.

Tasar Silk.—It is silk recled from coccons of silkworms belonging to saturnidae family, which are fed on leaves of Oak, Asan and Arjan trees. Tasar silk is mainly produced in Bihar, Madhya Pradesh, West Bengal and Orissa. Efforts are being made to introduce Oak tasar rearing in the States of Manipur, Jammu and Kashmir, Himachal Pradesh and Uttar Pradesh.

Eri Silk.—It is silk spun from cocoons of silkworms belonging to saturniidae family, which are fed on castor leaves. Eri yarn is produced in Assam, Bihar and West Bengal. Unlike other kinds of silk, this cannot be reeled and hence it is only spun. It has natural copperish colour.

Muga Silk.—It is silk produced only in Assam from coccons of silkworm belonging to saturnlidae family, which are fed on Som and Soalu leaves. It has a rich golden colour.

Spun Silk Yarn.—Yarn composed of ilk filaments of lengths ranging from 1 to 8 inches produced by bleaching, dressing and spinning the silk waste which is the by-products of the raw silk reeling industry.

Noil Yarn.—It is short-stapled residue obtained during dressing operations in silk spinning from silkwaste. It is a by-product of spun silk Industry. This can be spun into Noil Yarn of coarse counts.

^{*}Excluding Jammu.

7. IRRIGATION

Statistics of area irrigated from different sources and total area of crops irrigated are presented under this section.

Table 33:

This table presents data regarding total area irrigated by different sources which represents net irrigated area. If two or more crops on a given piece of land are irrigated in the same year from the same source, the area is counted only once.

Table 34:

This table provides data for total irrigated area under various crops which represents gross irrigated area and includes area irrigated under more than one crop during the same year. Area irr gated more than once in a harvest season is counted only once.

⁽d) Includes an area of 70 thousand hectures for which details are not available.

8. MINING

This section presents data regarding quantity, value and index numbers of mineral production in India.

The basic production data relating to major minerals except coal, petroleum and natural gas are collected by the Indian Bureau of Mines under Rules 14 of the Mineral Conservation and Deveopment Rules 1958 framed under the Mines and Minerals (Regulation & Development) Act, 1957. These rules cover all states of the Indian Union and apply to all minerals except (i) Petroleum and natural gas, (ii) Coal, (iii) minor minerals and (iv) any mineral declared as prescribed substance for the purpose of the Atomic Energy Act, 1962. The statistics of coal and lignite for all the states except Jammu and Kushmir are collected from the Coal Controller, Calcutta. The source for the coal and lignite statistics in respect of Jammu and Kashmir is the Jammu and Kashmir Minerals Ltd., Jammu, Statistics of minor minerals are collected from the State Governments. 'Minor Minerals' are those which are declared as such by the Central Government in exercise of the powers conferred by section 3(e) of the Mines and Minerals (Regulation and Development) Act, 1957. The production statistics of atomic minerals are not available for publication.

Table 35:

This table contains mineral-wise data regarding quantity and value of mineral production in India, distinguishing them by categories as fuels, metallic and non-metallic minerals.

Table 36 i

The index of mineral production covers economic activities in the mining and quarrying sector. Mining and quarrying is defined in a broad sense to include the extraction, dressing and beneficiation of minerals occurring naturally. It includes underground and surface mines, quarries and wells and all supplemental activities for dressing and beneficiating ores and other crude materials such as crushing, screening, washing, cleaning, grading, milling, flotation and other preparations, needed to render the material marketable. The Index of mineral Production has been revised with 1970 as weight base and comparison base in pursuance of the recommendations of the working Group on Revision of Index of Industrial Production. The revised Index of Mineral Production includes 61 items and these have been classified as per the National Industrial classification 1970 finalised by the C.S.O. Ilmenite and, rutile continue to be excluded from the scope of the index as these minerals are covered under Atomic Energy Act 1962.

The weights are based on the proportion of net value (value added) of each litem to the total value of the entire mineral sector excluding atomic and minor minerals.

INDUSTRY

9. INDUSTRY

This Section deals with the following items:-

- (a) Annual Survey of Industries--Census Sector,
- (b) Production of cotton yarn and piece-goods,
- (c) Production of man-made fibre fabrics,
- (d) Manufacture of salt,
- (e) Production of certain selected industries, [and
- (f) Index of Industrial production.

Tables 37 & 38

These two tables present data regarding Annual Survey of Industries, the scope and coverage of which is described below. The Annual Survey of Industries replaced the Census of Manufacturing Industries with effect from the survey year, 1959. The Survey is conducted under the authority of the "Collection of Statistics Act, 1953" and the "Collection of Statistics (Central) Rules, 1959" framed thereunder. These tables give state and industry groupwise information on important characteristics of manufacturing industries for 1959, 1961, 1966, 1968 to 1971, 1973-74 and 1974-75 at all India level and both all India and state levels in 1975-76. The data for 1972 survey are not available as the survey was not conducted for that year.

Geographically, the survey covered the whole of the Indian Union, including Jammu & Kashmir although the Collection of Statistics Act did not extend to Jammu & Kashmir. From Jammu & Kashmir the data initially were collected on a voluntary basis and later collected under the Jammu & Kashmir Collection of Statistics Act, 1961 and Rules of Collection of Statistics, 1964 framed thereunder.

The coverage of the survey extends to all factories registered under the Factories Act, 1948. Data however were not collected from defence installations, factories engaged in storage and distribution of oil and technical training institutes not producing anything for sale or exchange, even though these were registered under the Factories Act.

The Annual Survey of Industries upto 1965 relates to the Calendar year with the exception of sugar, cotton ginning and pressing factories and electrical undertakings for which the reference periods were respectively the year ending 30th June, 31st August ard 31st March respectively. From 1966 onwards it relates to the accounting year of the factories on any day between 1st Aprilto 31st March of the next year.

Definitions and concepts of some of the terms used in these tables are mentioned below :-

Productive capital—It consists of fixed and working capital. The former comprises land, buildings, plant, machinery, furniture, etc., and the latter consists of stocks of materials, fuels, semi-manufactured products, cash in hand and at the bank etc.

Number of persons employed—This is computed by taking the total attendance of persons in all the shifts on all the days and dividing it by the number of days worked. It includes persons attending and on leave with pay, and also those engaged in welfare activities.

Workers—The term "workers" is used in the same sense as in the Factories Act, 1948 but exclude persons holding position of supervision or management or employed in a confidential position. Under the Factories Act, a worker has been defined as "a person employed whether for wages or not in any manufacturing process, or any other incidental or connected work".

Man-hours worked—"The number of man-hours worked" during a year is calculated by multiplying the number of workers employed in each shift by the number of hours in the shift and aggregating the products for all shifts on all the working days in the year.

Salaries and Wages—The term"salaries and wages" includes all payments made in cash such as basic wages, dearness allowance, overtime payments, shift allowance, leave wages, bonus, etc.

INDUSTRY 95

Money value of benefits—These include Denefits like supply of cheap foodgrains, medical and educational facilities, payment of pensions, gratuity, employer's contributions to provident fund and Employees State Insurance, etc.

Value added by manufacture—This represents that part of the value of the product which is created in factory. It is computed by deducting from the gross ex-factory value of output, the gross—value of in put comprising cost of fuels and materials used, industrial and non-industrial services purchased and depreciation of fixed assets.

Tables 39-41

These three tables respectively present data regarding cotton yarn, cotton cloth and man-made fibre fabrics produced in cotton textile mills in India. The data are based on the statutery returns obtained by the office of the Textile Commissioner, under Cotton Textile (Control) Order 1948 and are published in their monthly publication Indian Textile Bulletin. All units of the organised cotton textile industry i.e. mill sector have been covered.

Table 40

Presents cotton cloth production data by weight and by length distinguishing it according to the category of cloth namely coarse, medium, fine etc. The data regarding total cloth produced by the decentralised sector of the cotton textile industry have also been shown in this table.

Table 41

Presents data regarding man-made fibre fabrics produced by power looms & hand looms and a the mill sector. Man-made fabric fabrics comprise art silk synthetic fabrics and staple fibre fabrics.

Table 42

This table presents data regarding installed capacity and production of selected industries in India. The data are based on the returns obtained from producing units on a voluntary basis by the Directorate General of Technical Development (DGTD), except in the case of coal, sugar, cotton & wollen textiles and iron and steel for which the information is obtained on a statutory basis by the Coal Controller, Directorate of Sugar & Vanaspati, Textile Commissioner and Iron & Steel Controller, respectively.

Figures for organized industries like iron and steel, sugar, cotton and jute textiles, cover almost the eatire production in the country. Jute production figures from January 1951 relate to mills in the membership of Ladian Jute Mills Americation which account for nearly 95 per cent of the entire output. Figures for other industries represent all organised factories in those industries but small units have been left out. An elaborate account of scope and coverage of statistics published in this table may be had from Appendix I to the Menthly Statistics of the Production of selected Industries of India for January and February 1969.

Table 43

This table presents the index numbers of industrial production with base 1970=100. The first index called the Interim Index of Industrial Production with 1946 as the base, covered 35 items. It was revised to base 1951 increasing the number of items to 88, and published in October, 1955. This was again revised and published in July, 1962 after shifting the base to 1956 and covering 201 items. The index was subsequently revised to base 1960=100. The monthly index of this series was based on 312 items and the annual index was based on 436 items. These index numbers were published in July-August 1967 (Supplement) of Monthly Production of Selected Industries. This index has been further revised to base 1970=100.

94 INDUSTRY

The index (1970=100) is based on 352 items. If in a group, an item occurs for which regular monthly series is not available, the weight of that group is adjusted by dropping the weight of that item while calculating the monthly group index. No such adjustment in weight is made while computing the major group index from such groups.

The weighting diagram for Div. 2 & 3—Manufacturing Sector, was based on the results of ASI 1970. For Division—1, Mining Sector, the net value added by that sector as estimated by Indian Bureau of Mines has been used. In case of Division—5—Electricity, the net value added in 1970 has been taken from the white paper on National Income published by CSO.

The index is a simple weighted arithmatic mean of production relatives, the weights being proportional to gross value of output as available from A.S.I.—1968, since these results for the base year 1970 were not available at that time. At the industry indicator levels, the weights were allocated in proportion to their gross value of output. The index is calculated by the formula:—

$$I = \frac{\Sigma RiWi}{\Sigma Wi}$$

Where I is the index, Ri is the production relative for the item 'i' for the month in question and Wi the weight allotted to it. The symbol Σ denotes summation over all the items. The index has been revised from time to time to reflect adequately the industrial growth by shifting the comparison base to a recent period by covering larger number of items and industries and by improving, as far as practicable, the technique of construction.

Note: Data from 1975 onwards are provisional. Source: Central Statistical Organisation.

⁽¹⁾ Figures represent the production of only large flour mills.

⁽²⁾ Figures of cane sugar refer to the crop year (Nov.—Oct.).

⁽³⁾ Total output of coffee cured, pounded and delivered to the coffee pool.

⁽¹⁾ Data for 1951 to 1956 are in thousands.

⁽²⁾ From 1962 onwards production figures are included in those of Pig iron.

⁽³⁾ Includes capacity for Direct castings and Ferro-alloys.

⁽¹⁾ The actual production for 1954 to 1961 was much in excess of installed capacity because while installed capacity was calculated for a sin gle-shift working, one of the units had been working for more than one shift.

⁽a) 10 months total (Jan.—Oct.).

10. POWER

Figures presented in this section relate to installed plant capacity, generation, consumption in power station auxiliaries, per capita consumption, and sales of electricity by public utility electric supply undertakings, whether owned by Government local authorities or companies. Military and Factory power stations are excluded as also Railway power stations with the sole exception of Chola Power Station, Bombay is inter-connected with the Tata Power System and the Renukoot Power House (U.P.) which is inter-connected with U.P. Grid. The data given in this section are compiled by the Commercial Directorate of the Central Electricity Authority, Deptt. of Power, Ministry of Energy and are published in their annual publication. "Public Electricity Supply—All India Statistics—General Review".

Table 44: This table presents state-wise figures of total installed capacity, electricity generated, electricity used in power station auxiliaries, and per capita consumption of electricity. The figures for installed plant capacity and electricity generated dot no include data relating to non-utilities such as self generating industries and Railways Figures of Electricity generated in a state do not include the power purchased from other states. Data on electricity generated by the Damodar Valley Corporation and the Central Government projects have been shown separately.

Table 45: The statewise data on Electricity sold to ultimate consumers by public electricity undertakings are presented in this table by categories of consumers namely Domestic, Commercial, Industrial Power, Public lighting, Traction, Agricultural, Public Water Works, Sewage pumping and Miscellaneous.

Table 46: In this table, data are presented for total number of towns/villages, number electrified along with the percentage electrified by States.

II. BANKS

The tables in this section present a consolidated picture of progress of banking in India, showing liabilities and assets of categories of banks as classified below:—

- (i) Reserve Bank of India.
- (ii) Scheduled Commercial Banks-
 - (a) State Bank of India.
 - (b) Other Indian Banks.
 - (c) Foreign Banks.
- (iii) Non-Scheduled Indian Commercial Banks.
- (iv) Indian Co-operative Banks.

Besides the above information, tables showing (i) the total number and amount of cheques cleared, (ii) percentage of cash balances to deposit liabilities of several classes of banks, (iii) working of Industrial Finance Corporation of India, (iv) State Financial Corporations, (v) Industrial Development Bank of India, and (vi) Industrial Credit and Investment Corporation of India.

Table 47:

Liabilities and Assets of the Reserve Bank of India (Banking Department): The table provides data relating to the Banking Department of the Reserve Bank of India. Figures relate to transactions in the Indian Union.

Table 48:

Liabilities and Assets of different classes of Banks:

This table provides data for liabilities and assets of various classes of banks, which are described below:

- A. Scheduled Commercial Banks:—The banks, which carry on business of banking in India and which are included in the second schedule to the Reserve Bank of India Act, 1934, are known as Scheduled Banks. These include the State Bank, other Indian Banks and Foreign Banks.
 - (i) The State Bank of India:—The State Bank of India was formed in July 1955, after the nationalisation of the Imperial Bank of India. Figures in this table relate to the business of the bank in India and abroad.
 - (ii) Other Indian Banks:—Indian banks are those who have their registered offices in India. These include data for Private Sector Banks and 14 Indian Banks which were nationalised with effect from 19 July 1969. The figures relate to the business both in India and abroad.
 - (iii) Foreign Banks:—Foreign banks are those who have their registered offices outside India. The data relate to their business in the Indian Union.
- B. Non-Scheduled Indian Commercial Banks:—The bank which are not included in the Second Schedule to the Reserve Bank of India Act, 1934, are known as Non-scheduled Banks.
- C. Indian Co-operative Banks:—These include scheduled Central and State Co-operative Banks.

Table 49:

The table shows the number and amount of cheques cleared at each principal clearing centre managed by the Reserve Bank of India. The total for all 'other centres' comprising clearing house managed by the State Bank of India, subsidiaries of the State Bank and Sangli Bank up to March 1967, is shown separately. The management of the clearing houses at Banglore, New Delhi, Nagpur, Patna and Hyderabad, was taken over by the Reserve Bank of India in October 1953, August 1956, March 1957, January 1969 and May 1969, respectively.

Table 50

This table gives data on 'cash deposit ratio' which represent percentage of cash balances in hand and at banks to total deposits of different classes of banks.

Tables 51-54:

The data provided in these tables relate to the working of the Industrial Finance Corporation of India, the State Financial Corporations, the Industrial Development Bank of India and the Industrial Credit and Investment Corporation of India respectively and furnish data on the liabilities and the assets of the same.

⁽¹⁾ The increases represent mainly the profit on revaluation of Bank's gold stocks.
(2) Includes National Agricultural Credit (Long-term operations) Fund, National Agricultural Credit (Stabilisation) Fund and National Industrial Credit (Long-term operations) Fund from the year 1956.
(3) Includes cash and short-term securities. From 1969 includes fixed deposits also.
(4) From 1966 onwards figures include loans and advances to State Governments from National Agricultural Credit (Long-term operations) Fund.
(5) Includes disbursements from National Agricultural Credit (Long-term operations) Fund and National Agricultural Credit (Stabilisation)Fund.
(6) Includes loans and advances to Development Bank and Agricultural Refinance Corporation

⁽⁶⁾ Includes loans and advances to Development Bank and Agricultural Refinance Corporation in 1972.

⁽⁷⁾ Figures from 1966 onwards include investments in Central & Mortgage Bank Debentures.

Source: Reserve Bank of India.

Note:—The data for 1966 specially of deposits are not comparable with those of the earlier years as these are based on revised basis of the classifications in respect of definition and coverage.

- (1) Excludes provident and deposits, staff security deposits and chit and kuri deposits from 1955.
- (2) Excludes money at call and short notice from 1955.
- (3) The progressive reduction in the number of Indian commercial banks, especially of non-scheduled banks in the last many years, has been primarily due to banks merger and amalgamation etc.

Note: -Totals may not tally due to rounding.

- Industrial Credit and Investment Corpn. of India.
- (1) Includes Reserve Fund, Reserve for doubtful debts and provision for taxation.
- (2) On account of shares and debentures partly paid held as investment and Guarantees and underwriting.
- (3) In Govt. securities, Bonds and debentures, shares and stocks and Unit Trust of India and I.R.C.I.
- (4) Guarantees and other Assets.

This section presents data regarding the number, membership and financial position of various classes of co-operative societies, thus depicting in abstract form the working of co-operative societies in India.

Tables 55-62:

Table 55 provides the data for number and membership of all types of co-operative societies.

Tables 56—62 present data regarding the number, membership and financial position respectively of the following classes of co-operative banks and societies:—

- (i) State Co-operative Banks.
- (ii) Central Co-operative Banks.
- (iii) Primary Credit Societies (Agricultural and non-agricultural).
- (iv) Grain Banks.
- (v) Central land development banks.
- (vi) Primary land development Banks.
- (vii) Primary non-credit Societies.

Statewise break-up for the latest year is given in respect of all these co-operative banks and societies except for Primary Non-Credit Societies for which the break-up is given according to type. 'The data relate to the years ending June. Prior to 1967-68 "Land Development Eanks" were termed as "Land Mortgage Banks".

13. JOINT STOCK COMPANIES

This section contains statistics relating to joint stock companies which are based on returns received from Registrars of Joint Stock Companies.

Tables 63—65

These tables present data regarding joint stock companies at work, newly registered and liquidated respectively.

Statistics are given for the number and paid-up capital of the companies, liability of which is limited by shares only. Authorised capital is given in the case of newly registered companies (Table 64). Companies Industrial are classified according to International Standard Industrial Classification of Economic Activity adopted in 1954-55. Earlier figures, according to old classification, were published in previous issues of the Abstract. The number of foreign companies, which carry on business in India is also shown in table 63. The figures relate to companies incorporated elsewhere than in India, the majority of which are with sterling capital.

14. INSURANCE

Figures in this section refer to the insurance business of insurers who transacted business under the Insurance Act, 1938. The Postal Life Insurance Fund (Tables 69 & 70) is, however, exempt from the operation of the Act. From 1 September 1956, life insurance was nationalised and the then existing business of Indian insurers, and Provident Societies and Indian business of foreign insurers was vested in the Life Insurance Corporation of India.

LIFE INSURANCE—Table 66-

This table gives the revenue account of the life insurance business in India. Figures are for the financial year ending 31 March except in the case of the year 1961, as L.I.C. have changed over to financial year as their accounting period, from 1 April, 1963.

Table 67-

This table shows the summary of the balance-sheet of life and other classes of business of the Life Insurance Corporation of India.

Table 68-

This table gives the new life insurance business by Indian Insurers during the year and total business in force at the end of the year.

POSTAL INSURANCE—Tables 69 & 70-

The postal insurance data were available separately for whole life and endowment, upto the year 1963-64. As the accounts for the two, have been amalgamated and are not being maintained separately from April 1964, consolidated data for whole life and endowment postal insurance, are shown in Tables 69 & 70 from 1964-65 onwards.

MIRE, MARINE AND MISCELLANEOUS INSURANCE—Table 71-

Figures for Insurers are for calendar year ending 31 December while those for Life Insurance Corporation of India are for financial year ending 31 March excepting 1972 figures which are for the 9 month period ending 31 December, 1972.

Table on General Insurance has been discontinued as this data for this table were not available after Jan. 1, 1973, when general insurance was nationalised. The business of general insurance was done by non-Indian agencies.

Note:—Figure for the year 1966-1972 include General Insurance Business of the Life Insurance Corporation of India. Since 1-1-1973. The L.I.C. of India has not been transacting any general insurance business. Figures for Insurers other than L.I.C. are for calendar year ending 31 December while those for L.I.C. are for financial year ending 31 March, except 1972 figures which are for 9 months ending 31 December, 1972 in respect of L.I.C.

15. TRADE

(A) FOREIGN TRADE

The figures represent trade with foreign countries both on private and government accounts, registered at Indian sea-ports, airports and land customs stations. Statistics are recorded on the basis of the general system of registration under which the goods arriving from abroad are first included under imports and when they are shipped again they are included under re-exports. With effect from April 1963 trade arising in Goa, Daman & Diu, the Andaman & Nicobar Islands and the Laksha Dweep is included. In the case of Nepal, airborne trade alone was covered upto March, 1964 subsequent to which it covers both by land and air. The sources of foreign trade statistics are customs and central excise authorities. These are compiled by the Directorate General of Commercial Intelligence & Statistics from the bills of entry and shipping.

IMPORTS— Tables 74 & 79

Import figures generally show the trade as declared by importers in the bills of entry (applications for clearance) and as checked by customs officials.

Goods entered for storage in bonded warehouses and afterwards exported therefrom are included under 'imports' and 're-exports'. Transhipment trade is not recognised for the purposes of Indian trade returns and is, thus, not included here. Direct transit trade is also excluded.

Imports of bagagge of passengers are not included since November, 1964. All dutiable article imported from foreign countries by parcel or letter post are included. Exports and Re-exports—Tables 75, 76 & 80

Export figures represent actual shipments as checked by the customs officials. Adjustment due to short-shipments in respect of transactions notified in January of one year to February of the second year are included in the statistics for the second year. The figures of exports relate to Indian merchandise alone and re-exports to foreign merchandise previously imported into India.

All articles despatched to foreign countries by parcel or letter post are included since 1964-65.

The country-wise imports, exp orts and re-exports are given respectively in Tables, 74, 75, 76 & 77. The countries are listed in alphabetical order.

OVERALL BALANCE OF TRADE-Table 77

From April 1948 total value of foreign trade of India by all routes (i.e. sea, air and land) has been taken into account for the purpose of calculating the balance of trade. All foreign trade transactions in gold, currency notes and coins are included under treasure. Balance of trade in treasures refers to gold and silver up to December 1956 and thereafter gold only. Trade in silver is included under merchandise after December 1956.

CLASSIFICATION OF THADE BY COUNTRIES—Tables 74 & 75

Imports are classified with reference to the countries whence they were consigned to India and not with reference to the countries whence they were shipped direct to India. The country of consignment is defined as that from which the goods have come whether by land and sea or by sea only or by air, without interruption of transit save in the course of transhipment or transfer from one means of conveyance to another. Thus the countries whence goods are consigned are not in all cases the countries of actual origin of goods since goods produced in one country may be purchased by a firm in another country and thence despatched after an interval to India.

Exports are credited to the country of final destination as declared by exporters in the shipping bills whether that country possesses a sea-port or not. The country of final destination is defined as that to which goods exported from India are intended to pass whether by sea and land or by sea only or by air without interruption of transit, save in the course of transhipment or transfer from one means of conveyance to another.

The figures are those declared by importers and exporters in the bills of entry and shipping bills. The value of goods represents the wholesale cash priceless trade discount for which goods (i) the like kind and quality are sold or are capable of being sold at the time and place of importation or exportation as the case may be, without any abatement or deduction whatever, except that in the case of goods imported, of the amount of duties payable on the importation thereof, or (ii) where such price is not ascertainable the cost at which the goods of the like quality could be delivered at such place without any abatement or deduction except as aforesaid. Import valuation in practice corresponds to c.i.f. method, but export valuation was, prior to April 1951, not strictly on f.o.b. basis as it did not take into account export duties and such items as dock charges, cost of transport, etc., up to the vessel. With effect from April 1951, however, the basis of export valuation has been changed so as to conform strictly to f.o.b. basis inclusive of export duty and/or cess where leviable.

Currency Areas—Tables 78A, 78B & 78C

The following classification has been adopted from the year 1956-57.

Dollar Area.—United States of America, Canada (including Newfoundland and Labrador) Cuba, Haiti, Dominican Republic, Puero Rico. Virgin Islands of the United States, Mexico, Gautemala Honduras (not British), Salavador, Nicaragua, Coasta Rica, Columbia, Republic of Panama, Panama Canal Zone, Venezuela, Ecauador, Bolivia, Howai, Phillippines, Liberia and American Samoa.

Sterling Area.—All Commonwealth countries (excluding Canada) together with Irish Republic, Iceland, Jordan, Muscat and Oman and Burma. Iraq has been transferred to 'other soft currency' areas, subsequent to June, 1959. Cameron and

Somalia Republic have been included with effect from April, 1963.

Other Soft Currency Area.—All other countries.

Currency are figures include the latest adjustments and, therefore, do not always

tally with the figures in the preceding tables.

Under the revised classifications of the economic regions employed by the Directorate General of Commercial Intelligence & Statistics, Calcutta with effect from financial year 1976-77, the countries included in respective regions are mentioned below and a Special Table has been compiled on the basis of monthly data furnished by the Directorate General of Commercial Intelligence & Statistics, for publication in the Monthly Abstract of Statistics brought out by this organisation.

Region 01: East African Community

Kenya; Tanzania, United Republic of; and Uganda.

Region 02: Organisation Commune African Malagache

Benin (Danomey); Cameroon, United Republic of; Central African Republic Chad; Congo (People's Republic of Congo); Gabon; Ivory Coast; Malagasy Republic (Madagascar); Mauritinia; Mauritius; Niger; Rwanda; Senegal; Togo; Upper Volta; Zaire, Republic of.

Region 03: Organisation of African Unity

Angola; Batswana; Burundi; Canary Islands; Cape Verde Islands; Camoros; Ethiopea; Equatorial Guinea; French Southern and Antaretic Territories; French Territory of the AFARS of ISSAS (Somaliland); Gambia; Ghana; Guinea; Guinea Bissau; Lasotho; Liberia; Malwi; Mali; Nambia (South West Africa); Nigeria; Other East African Countries; Reunion; Sao Thome & Principle; Seychelles; Sierra Leone; Somalia; St. Helena of Asscension; Swaziland; Western (Spanish) Sahara and Zambia. Region 04: Other African Countries

Algeria; Egypt Arab Republic of; Libya; Morocco (including Tangier); Rhodesia; South Africa; Sudan; and Tunisia.

Region 05: North America

Canada; Greenland; St. Pierra and Miquellon and United States of America.

Region 06: Latin American Free Trade Association

Argentina; Bolivia; Brazil; Chile; Colombia; Ecuador; Mexico; Paraguay; Peru; Uruguay and Venezuela.

Region 07: Carabian Free Trade Association

Antigua; Bahamass; Barbador; British Virgin Islands; Cayman Islands; Cuba; Dominican Republic; Dominica; Grenada; Guadaloupe (Formerly French West Indies); Guyana; Haiti; Jamaica; Martinique; Montserrat; Netherlands Antillies; St. Kitts-Nevis-Anguilla; St. Lucia; St. Vincent: Trinidad and Tobago; Turks and Caicos Islands and Virgin Islands of U.S.

Region 08 . Central American Common Market

Coasta Rica; El Salvador; Guatemala, Honduras, Nicaragua,

Region 09: Other American Countries

American Samoa; Belize (Br. Honduras) Bermuda; Falkland Islands: Panama (Excluding Canalzone) Panama Canal Zone; Puerto Rico and Surinan.

Region 10: ESCAP Countries

Afghanistan; Australia; Bangladesh; Brunei; and Burma; China; People's Republic of Christmas Islands; Cook Islands; Fiji Islands; Gilbert and Ellice Islands; Hong Kong; Indonesia; Iran; Japan; Kampuchea Democratic Republic (Formerly Khemer); Korea Republic; Laos People's Democratic Republic; Malaysia; Mongolia; Nauru Republic of; Nepal; New Zealand; Pakistan; Papua and New Guinea; Phillippines; Singapore, Solomon Islands; Sri Lanka; Thailand; Tonga; Tuvalu; Vietnam Republic of; and Western Samoa.

Region 11: Economic Commission for West Asia

Bahrein Island; Iraq; Jordon; Kuwait; Lebanon; Neutral Zone; Oman; Qatar; Saudi Arabia; Syrian Arab Republic; United Arab Republic (formerly Trucial States of Abu Dhabi; Dubai; Sherjah etc.) Yemen People's Democratic Republic of; Yemen Arab Republic.

Region 12: Other Asian and Oceanian countries and Antarctic and Arctic regions

China Republic (Formerly Formosa); Cocos Islands; French Guiana; French Polynssia (Oceania); Guam; Israel; Korea, Democratic People's Republic; Macao; Maldive Islands; New Caledonea; New Hobrides; Nive Islands; Norfolk Islands; Pacific Islands (Trast Territory of); Pitcairn Islands; Portuguesa Timor; Sabah, Sarawak; Tokelau Islands; Vetnam, Democratic Republic of; and Wallis & Futuna Islands.

Region 13: European Common market countries

Belgium; Denmark; France; Germany, Federal Republic of; Ireland; Italy; Luxemburg; Netherlands and United Kingdom,

Region 14: European Free Trade area countries

Austria; Faeroe Islands; Finland; Iceland; Norway; Portugal; Sweden; and Switzerland.

Region 15: East European countries

Bulgaria; Czechoslovakia; Germany, Democractic Republic; Hungary; Poland; Rumania and U.S.S.R.

Region 16; Other European countries

Albania; Andorra; Channel Islands; Cyprus; Gibraltar; Greece; Liechtenstein; Malta; Spain; Turkey and Yugoslavia.

INDEX NUMBERS OF QUANTUM AND UNIT VALUE OF EXPORT AND)MPORTS Tables 81 & 82—

Many significant changes took place in the pattern of India foreign trade since 1958. New commodities entered into the exports and many other items, which were insignificant earlier and gained importance. The commodity composition of imports, too, changed with the changing needs of the country. In view of changing pattern of foreign trade, the base period was changed to 1968-69 and the corresponding commodities basket was revised.

Scope and Coverage

In order to ensure adequate coverage of trade for the new series of index numbers, the number of included items has been increased to 489 in the case of exports as against 317 in the old series. As regards imports the number of items remains the same i.e., 511 as in the old series. The overage of the revised commodities basket accounts for 92 per cent of the value of exports and 89 per cent of imports for the year 1968-69.

Method of Construction

As in the case of old series, the revised Index Numbers are of the fixed base type. The Unit Value (Price) Index numbers are calculated according to the Paasche formula and the Quantum Index Numbers according to Laspeyres formula; these are however not computed separately but are derived from the former indices.

The method of calculation of Unit Value Indices briefly consists of comparing the trade in the current period with that valued at 1968-69 prices. Symbolically, the Unit Value Index Number P is given by the formula:—

$$P = \frac{\sum p_n \ q_n}{\sum p_o \ q_n}$$

where, P and p_n denote the unit value of an article in the base period and the current period respectively and q_o and q_n its respective quantities in these periods.

As mentioned above, the Quantum Indices are derived from the unit value Indices (P) as follows.

$$\frac{V_a}{V_o} \times 100/P$$

where, V_o and V_n are the total values of trade in the base and current periods respectively.

Adjustment for Incomplete Coverage

It is not possible in practice to include all the commodities entering into trade since information on quantities lacking for many miscellaneous items in the trade records. Such items cannot be included in the cross valuations and hence do not appear directly in the compilation of Index Numbers. Adjustments have, therefore, been made in the final Index Numbers to allow for incomplete coverage. These adjustments are based on the assumption that the price changes in the items not covered in a section are similar to those shown by the items included in the calculation for the section. The method of adjustment can be explained symbolically as below:

The unit value Index (P1) for the included items in i th section is given by the formula:—

$$p_i = \frac{\sum_i p_n q_n}{\sum_i p_o q_n} \qquad (1)$$

Where Σ_i =Summation over all included items in the section. The index for all the items of the section will be

$$p'_{i} = \frac{\Sigma'_{i} p_{n} q_{n}}{\Sigma'_{i} p_{o} q_{u}}$$

Where ≥ =Summation over all items in th. section The adjusted General Index number P' will be

$$\mathbf{p'} = -\frac{\sum_{i=0}^{8} \Sigma'_{i} p_{n} q_{n}}{8}$$

$$\sum_{i=0}^{8} \Sigma' p_{e} q_{n}$$

While the aggregate $\Sigma'_{i}p_{n}q_{n}$ is known, the aggregate $\sum_{i=0}^{8} \Sigma'_{i}p_{o}q_{n}$ is unknown and it cannot be

computed directly. It is therefore estimated on the assumption that the price changes for the covered items and for all the items in a section are the same. In other words, $P_1 = P'_1$.

$$P_{i} = \frac{\sum_{i} p_{n} q_{n}}{\sum_{i} p_{o} q_{n}} = \frac{\sum_{i}' p_{n} q_{n}}{\sum_{i}' p_{o} q_{n}}$$

$$\Sigma'_{i}p_{o} q_{n} = \frac{\Sigma'_{i}p_{n} q_{n}}{\Sigma_{i}p_{n} q_{n}} \times \frac{\Sigma_{i}p_{n} q_{n}}{\Sigma_{i}p_{n} q_{n}} = \Sigma'_{i}p_{n} q_{n} \left| \frac{\Sigma_{i}p_{n} q_{n}}{\Sigma_{i}p_{o} q_{n}} \right|$$

Total value of all items in the ith section

unadujsted unit value Index for the ith section

The adjusted General unit value Index Number P' is obtained by substituting the above value of $\Sigma' p_0 q_n$ summing over i=0 to 8 in the equation (3).

Quantum Indices are similarly adjusted for incomplete coverage by using the adjusted unit value Index P' instead of the unadjusted Index P occurring in the formula for deriving the Quantum Indices.

Linking of the old and revised series.

The linking of the new series of index numbers I (new) with the old series I (old) would be possible by the application of the formula given below:--

I old series=K I new

Where
$$K = \frac{\Sigma \text{ I old}}{\Sigma \text{ I new}}$$

An empirical study has demonstrated that this formula gives more precise results than the other formulae meant for this purpose.

(1) I old = C I new where
$$\hat{e} = \frac{I}{n} - \underbrace{\frac{I \text{ old}}{I \text{ new}}}_{i=1}$$

(2) I old =
$$a + b$$
 I new where $b = \frac{Covb (I \text{ old I new})}{Var (I \text{ new})}$

Tables 80-81—

Coasting trade statistics represent the trade registered at the ports in the States, that is, the trade between one State on one side and all other States on the other. The trade among ports within the same State has not been included.

The following Maritime Blocks each of which corresponds to a Maritime State or Union Territory, have been adopted from April, 1957 :-

(1) West Bengal (2) Orissa (3) Andhra Pradesh (4) Tamil Nadu (5) Kerala (6) Karnataka (7) Bombay (8) Andaman and Nicobar Islands and (9) Lakshadeep.

Further, consequent on bifurcation of Bombay State, two separate maritime blocks (i) Maharashtra and (ii) Gujarat are being shown from April 1961. Pondicherry has been adopted as a maritime block for the purposes of coasting trade statistics with effect from the same date. Besides Goa, Daman and Diu is being treated as a separate maritime block in coasting trade with effect from April 1963. Again Daman and Diu are being included under Gujarat with effect from April, 1964.

In pursuance of Government orders with effect from April, 1964 coastal trade statistics are being compiled on import basis from daily trade returns received from the ports open to coastal trade. Export figures are being derived from import data, as imports into one port represents the exports from other ports. Statistics relating to treasure is however being compiled on old basis from import and export returns submitted by each maritime block.

The figures show generally the trade as declared in the shipping documents duly scrutinised and passed through the customs houses. The term "Indian merchandise" comprises all goods which are of the growth, produce or manufacture of India. Indian merchandise is distinguished from foreign merchandise in the declartions made by importers or exporters in the bills of entry or shipping bills from which the trade

statistics are compiled. Passengers' baggage, postal articles and merchandise transhipped at Custom ports are excluded from the scope of these statistics. Imports and exports of treasure which include gold coin as well as bullion and silver (current coins) only are recorded separately and are not included in the figures of merchandise. Transactions in silver (other than current coins) have been included in merchandise with effect from April, 1961.

In the value of articles imported or exported as recorded in the coasting trade,

customs and excise duties previously paid are included.

The year refers to the period of twelve months, April to March.

Table 85— (C) Inland Trade

Nature and scope.—Inland Trade Statistics represent the movement of trade by railways and on steamer service, from and into a State taken as a whole or a chief port or ports, the trade of which is registered separately from that of the state in which such port or ports may be situated. Movement of trade by other means (e.g., road.

air, country boats etc.) is thus excluded from the scope of these statistics.

Trade Block.—Prior to April, 1962 there were 29 Trade Blocks. The list has since been amplified with a view to taking into account the bifurcation of the erstwhile Bombay State into Gujarat and Maharashtra. It was further amplified in April, 1965 to provide for separate formation of Nagaland. For the purposes of accounts, and as from April, 1965, India is divided into 31 Trade Blocks, representing the States and Union Territories except Andhra Pradesh, Gujarat, Kerala, Tamil Nadu, Maharashtra, Karnataka and West Bengal which have been constituted into more than one Trade Block. The reorganisation of the Punjab and Himachal Pradesh has been given effect from April, 1967. Chandigarh is shown as a separate Trade Block.

Method of Registration.—The figures from April, 1965 onwards represent actual exports from each trade block. According to arrangement in force, each of the railways and the steamer companies registers such traffic as is despatched from stations on its line within a particular trade block to other trade blocks. Prior to April, 1965 these figures were recorded on 'imports' basis. In case of Tripura, however, there is no railway or steamer station or out-agency within the trade block, and special arrangements have been made to record the trade. The trade of this block is recorded by the fol-

lowing agencies:--

(i) in respect of trade *via* Eastern Bengal Railway by five and customs stations on the Tripura Bangladesh border;

(ii) in respect of trade via Patharkandi station on the Assam-Tripura border, by

the North East Frontier Railways.

River borne trade.—The statistics upto the period ending August, 1965 cover only the trade carried only by the River Steam Navigation Co. Ltd. between the Trade blocks mentioned below. No account is taken of (a) trade carried by other steamer owners or boat-owners between these trade blocks or (b) river borne trade between other trade blocks.

(1) Calcutta. (2) Assam. (3) West Bengal (excluding Calcutta).

For the purposes of registration, trade originating in a railway and transhipped, under through booking arrangements, at a railway station to a steamer for conveyance to a river station, is treated as carried wholly by rail. The above company, however, suspended its steamer service from September 1965. Thus the statistics relate only to rail-borne trade from September, 1965 to 1971-72, thereafter *i.e.*, from 1972-73 the Central Inland Transport Corporation Ltd., Calcutta, are furnishing statistics in respect of river borne trade between the above mentioned blocks.

Articles and Units of measurement.—The trade in certain staple articles only is recorded and the weight recorded is the net weight *i.e*, the gross weight entered in the invoices less certain fixed percentages which have been taken to represent the weight of packing etc. Values are not recorded. Figure of oil seeds represent the trade in the following varieties: (i) Castor, (ii) Cotton seed, (iii) Ground nut, (iv) Linseed, (v) Rape and mustard, (vi) Til (jinjili Cotton piece goods include both Indian and foreign both. Jute raw includes both loose and *Pucca* bales. Raw cotton figures do not make distinction between ginned and unginned.

Period.—Figures relate generally to the financial year April-March, but in the case of raw cotton figures relate to the year September-August.

Note: - Figures of 1973-74 are not available.

⁽¹⁾ Goa, Daman and Diu were treated as a separate maritime block in coastal trade with effect from April, 1963. Subsequently from April, Daman and Diu are included under Gujarat.

⁽a) Distinction between Indian and Foreign Merchandise has been abolished with effect from April, 1964.

⁽¹⁾ Raw cotton figures relate to cotton year ending August.

Note:—Each of the three maritime states of Kerala, Tamil Nadu and Maharashtra is divided into three sub-trade blocks. The figures of the third sub-trade block, viz., "other ports" for all these states are not shown in the break-up. Hence the sum of the break-up does not add up to the total.

The balance of payments is a record of economic transactions of the residents of a country with the rest of the world on account of goods exported and imported, services rendered and received and transfers of capital. Residents cover nationals as well as non-nationals residing in the country. Foreign students, tourists, foreign diplomatic officers and international institutions are not considered to be residents but diplomatic officers and armed forces of the country, stationed abroad, are treated as residents notwithstanding their physical location.

India's balance of payments statistics presented in this section are derived for the most part from exchange control records. The figures relate to Indian Union and include Indo-Pakistan transactions also.

Table 86

Current Account.—Economic transactions that enter the current account of the balance of payments are of the following types. A surplus on current account leads to an acquisition of assets or repayment of debts previously contracted and a deficit involves withdrawal of previously accumulated assets or is met by borrowings.

Merchandise.—The figures refer to recorded transactions and include estimates of unrecorded imports paid with Indian currency notes but exclude transactions under Government barter deals. Imports are inclusive of insurance and freight although these two elements come, strictly speaking under the category or services. Exports are f.o.b. Gold transactions are recorded separately under the head "non-monetary gold".

Transportation and Insurance.—Receipts cover estimated amounts for reimbursements of freight and insurance paid in advance by exporters and disbursements of foreign ships in Indian ports, etc., and payments include operating expenses abroad of Indian steamship companies and some freight and insurance payments.

Investment income.--Receipts include interest on the investments of the Reserve Bank of India.

Government not included elsewhere.—The payment figures represent disbursements of the Government for example, for the upkeep of its organisations abroad and upto Jan-March, 1964 contributions to international organisations. Beginning with April-June, 1965, the data for receipts exclude refund of freight on P.L. 480 imports initially borne by India but subsequently refunded by U.S. Authorities.

Miscellaneous.—This items covers, in the main receipts and payments for services such as those for film rentals, technicians and agency services.

Transfer payments.—Official transfer payments represents contra entries for imports financed by aid received under the Colombo Plan and Indo-American Technical Co-operation Agreement, receipt of cash grants mainly from the Ford Foundation and in addition since April-June, 1964, receipts and payments of pensions on Government account and contributions to international organisations. Private transfer payments comprise unilateral transfers like maintenances, remittance, receipts of missionaries, remittances of savings, migrants' transfers etc., and in additions since April-June, 1964 receipts of pensions, retirement benefits etc., on private account.

Errors and Omissions.—This is a reconciliation entry to balance the difference in the total debits and credits. These differences arise due to difference in timings between the two arms of a transaction or their coverage.

2. Capital Account:

This account indicates how the transactions under the current account affect the country's investment position abroad. Explanations of the various categories included are given below:

- 1. Private (non-banking).—Includes drawing and payments on account of I.B.R.D. loans and other foreign Government loans to private sector in India since April, 1964.
- (a) Private Long-term Capital.—Transactions covered are mainly cash transfers and do not include investments in the form of goods brought from abroad or the reinvested earnings of foreign controlled companies in India.
- (b) Private Short-term Capital.—Mainly includes seasonal capital received from abroad for financing foreign owned plantations and net charges in the short-term indebtedness or claims abroad of business institutions.
 - 2. Banking.—This includes transactions by Reserve Bank of India.
 - 3. Official (Including R.B.I.).—Comprises the following:
- (a) Loans.—Credits represent utilization of various foreign loans and credits obtained by the official sector from the I.B.R.D., I.D.A. and Foreign governments, as well as rupee loans out of P.L. 480 and P.L. 665 counterpart funds, and drawings from the I.M.F. The entries on the debit side relate to the repurchase of rupees from the I.M.F. and loans extended to other countries.
- (b) Amortisations.—Entries relate mainly to repayments of loans from the I.B.R.D. and from foreign governments, capital withdrawals and disbursements relating to the pension annuity arrangement under the Indo-U.K. Financial Agreement of July, 1948, capital repayments by the U.K. of excess pension fund under the pension Resettlement Arrangement of March, 1955, repayment of partition debt by Burma and repayments of the loan extended to Burma in 1957.
- (c) Miscellaneous.—Covers capital receipts and payments on official account other than loans and amortisation transaction for example, changes in P.L. 480 and P.L. 665 balances and the rupees liability of the R.B.I. to non-resident official and semi-official institutions including rupee balances held with the R.B.I. by the East European countries under payments agreements, technical credit advances to and repayment thereof by the East European countries, and transactions with Kluwait, Bahreins and Qatar consequent to the withdrawal of Indian currency from these countries.
- (d) Reserves.—Represents changes in the foreign exchange assets of the R.B.I. and the Government and the gold holdings of the former.

Table 87

Regional Balance of payments.—Current Account.—This table provides data on the regional aspect of the current account. The area-wise division of current transactions shown is based on definition of these areas current during the various periods concerned as detailed below:—

Sterling Area.—All Commonwealth countries (excluding Canada and Newfoundland) together with Burma, Jordan, Libya, Muscat & Oman, Irish Republic and Iceland.

Dollar Area.—Covering United States of America, Canada (including New found land), Cuba, Haiti, Dominion Republic, Puerto Rico, Virgin Islands of the United States, Mexico, Guatemala, Honduras (not British), Salvador, Nicaragua, Costa Rica, Colombia, Republic of Panama, Panama Canal Zone, Venezuela, Ecuador, Bolivia, Hawaii, Philippines, Libya and American Samoa. Figures for 1951 and 1952 refer to "Hard Currency Area" comprising the United States of America, other American Account Countries, Canada, Liberia, Argentina and Japan. The last two ceased to be hard currency countries from January 1951 and October 1951, respectively.

O.E.C.D. Countries.—Covering Sweden, Norway, Denmark, West Germany, Netherlands, Belgium, Luxembourg, France, Portugal, Switzerland, Italy, Austria, Greece, Turkey and Spain.

Table 88

External Assistance.—This table shows at a glance the aid received from all sources upto March 31, 1978.

⁽R) Revised.

⁽P) Preliminary.

^{*} Exports f.o.b. imports c.i.f.

⁽a) Include Rs. 8.3 crcres paid to the I.B.R.D. as our contribution to the Indus Basin Development Fund under the terms of the Indus Water Treaty signed on September 19, 1960. Since April-June 1964, these payments amounting to Rs. 8.3 crores in 1965 and Rs. 13.0 crores in 1966 and 1967 and Rs. 11.2 crores hereafter are included under official transfer payments.

[†]Includes Rs. 8.4 crores earmarked by the U.S. authorities to Nepal under their economic aid Programme to that country.

⁽¹⁾ As it was constituted till June 23, 1972.

⁽²⁾ Includes figures of the O.E.E.C. countries also in the year 1950-51.

17. RAILWAYS

This section includes tables providing statistics of passenger and goods traffic, revenue and expenditure and general working of Indian Railways. The statistics are collected by the Railway Board, Ministry of Railways from various Zonal Railways. Indian Railways are classified as Government and Non-Government Railways. The Government Railways are classified by zones as mentioned below:

(i) Central (ii) Eastern (iii) Northern (iv) North East Frontier (vi) Southern (vii) South Central (viii) South Eastern (ix) Western.

The Indian Railways are also classified by gauges as Broad (1.676m.), Metre (1.000m.) and Narrow 0.762m. & 0.610m. according to the distance between two rails in metres mentioned in brackets.

Table 89:

This table provides the summary results of the general working of Indian Railways. The definitions of various terms used in this table are given below.

Route Kilometres.—This represents the length of the Railways route open for traffic at the end of each year. In calculating the length of the route double or more than double lines are counted only once.

Gross Earnings and Working Expenses.—Represent total earnings and expenses of railways in an accounting period irrespective of whether the earnings have been realised or expenses paid. Gross earnings include all earnings from passenger traffic, goods traffic, parcels, luggage and other miscellaneous sources of revenue while working expenses include all expenses incurred for maintenance of structural works, supply of loco power, carriage and wagon stock, ferry steamers and harbours as well as the expenses of traffic departments, general and electric service departments and other miscellaneous expenses.

Train Kilometres.—This represents the kilometres run by trains carrying passengers or goods or both as well as the kilometres run by empty trains. No deduction is made for departmental trains.

Number of Passengers and Metric Tons carried.—The figures represent the number of passengers and weight in metric tons of goods, originating on all Railways, treating passengers travelling or goods carried over two or more railways as single journey.

Passenger-Kilometres and Not Metric Ton-Kilometres.—These figures represent the real indices of the volume of passengers and goods traffic handled. These are arrived at by multiplying the total number of passengers carried and the total metric tons of goods carried by the respective number of kilometres, over which they are moved.

This table provides data in respect of passenger and goods traffic and earning of the Government and Non-Government Railways. The number of passengers carried and tonnage of goods carried, unlike in table 89, represent total number of passengers and total tonnage of goods carried on individual railways treating passengers travelling and goods carried over two or more Railways as having performed two or more journeys. Table 91:

This table presents the capital earnings and expenditure position separately of the Government and Non-Government Railways.

Table 92:

This table provides the results of the financial working of Government railways, showing capital at charge, gross receipts, operating expenses, depreciation fund, reserve fund, net receipts, etc.

Table 93:

This table presents data relating to revenue, expenditure and their net of the Railways for which Government is financially responsible. The revenue includes State Railway gross receipts, subsidiary companies miscellaneous receipts. The expenditure includes State Railways' working expenses, subsidiary paid to companies, miscellaneous expenditure, dividend on loan capital and payment to general revenue in lieu of tax on passenger fare.

Table 94:

Table 90:

This table provides details of gross earings of Indian railways from passenger and goods traffic.

Table 95:

This table presents data regarding number of persons injured and killed according to nature of accidents. The figures exclude the persons killed or injured in Railway workshops.

⁽¹⁾ Represent the total number of passengers carried in individual railways treating passengers, travelling over two or more railways as having performed two or more journeys. These remarks apply to metric tons carried also.

(2) Excludes the element of duplication involved in number received, as same gauge junctions from other Indian Government Railways.

(a) Includes Marmagao harbour earning is of Rs. 23,93,000 for 1955-56.

(b) Includes 21000 Tonnes received from Non-Govt. Railways.

⁽²⁾ Includes accidents due to trespasses and suicides.

Motor Transport in India, is basically a State subject under the Constitution of India. For the sake of uniformity among the states, the Central Government enacted the Motor Vehicle Act. The State Governments, keeping in view the local needs and circumstances, framed their own rules for administration of this Act. The act lays down laws relating to licencing of drivers of motor vehicles, of conductors of state carriages, registration of motor vehicles, control of traffic, etc. The detailed information on the nature and pattern of the administration or the Motor Vehicles Act in each State given in the publication 'Motor Transport Statistics' brought out by the Ministry of Shipping and Transport.

Table 96

Number of Motor Vehicles Registered in India as on 31st March of each year.— The figures shown in the table represent the number of motor vehicles on road and includes only Motor Vehicles taxed for 1951, tax and tax-exempted upto 1968 and taxed, tax-exempted and temporarily withdrawn upto 1972. Thereafter the number of motor vehicles on road includes Motor Vehicle taxed and tax-exempted only. Separate figures for temporarily withdrawn vehicles for the period 1969-72 are not available.

Table 97

Central and State Revenue from Road Transport.—(i) State Revenue from Road Transport and (ii) Central Revenue from Road Transport. The Central revenue consists of Import duty and excise duty on motor vehicles and accessories, tyres and tubes and motor fuel. The State Revenue consist of motor vehicle taxes and fees levy sales tax on motor spirit and sales tax on passengers and goods carried. The sales tax on motor spirits levied at varying rates under varying conditions in the different States. In some cases, the levy on motor spirits made under the Central Sales Tax Act and in other cases under special Motor Sales Tax Act. Taxes on passengers and goods carried by road or on inland water-ways under entry 56, of List II of the Seventh Schedule of the Constitution, are levied in Andhra Pradesh, Assam, Bihar, Gujarat, Kerala, Madhya Pradesh, Maharashtra, Karnataka, Orissa, Punjab, Rajasthan, West Bengal and Himachal Pradesh.

Table 98

Number of vehicle plying on Inter-State Routes.—The figures shown in the table give the number of commercial vehicles (State Carriages and Trucks) plying on Inter-State Routes with regular permits.

Table 99

Working of Transport Undertakings of various States.—Almost all the major States of India have accepted nationalisation of bus services as a basic policy and many have nearly taken over the entire private bus transport in their area, with a view to ensuring autonomy and efficient administration. The nationalisation of road transport is mostly confined to the passenger traffic so far.

19. ROADS

Table 100

The road length of highways presented in this table, consists of the route lengths of highways running through the length and breadth of the large administrative areas of districts, States and the Country, connecting all Urban areas/Centres of traffic.

- (a) National Highway is a highway which is declared as such under the National Highway Act, 1956.
- (b) State Highway is a highway which is declared as a State Highway by a State Government.
- (c) District Highways are those highways which are maintained by State Public Works Departments (except National Highways and State Highways) and district Board/Zilla Parishad.
- (d) Block Highways are those highways which are maintained by Village Panchayats, Panchayat Samities or Community Development Blocks.

Table 101

The data on road lengths shows in this table relate to roads constructed and maintained by Municipalities/Corporations, CPWD, roads constructed and maintained by Railways within Railway Colonies and Port Authorities in the Port Areas and others including Military Engineering Service in Cantonment areas.

Table 102

The road lengths given here include the lengths of access roads within project areas for exploiting resources such as forests, hydro-power, Sugarcane, Irrigation, Coal. etc.

Table 103

Width-wise Length of National and State Highways.—Roads are classified as single lane, double lane or multilane, according, as the carriageway width of the roads (other than that in hilly terrain) is below 7 metres, 7 to 10.5 metres and above respectively as per standards laid down by Indian Roads Congress.

Table 104

The Shipping and Transport Ministry purchases heavy and sophisticated items of road making machinery for their own use and also loans some items for the use of State government departments. The Central Government also sanctions long term loans to states for purchase of road making machinery. State governments purchase on their own all types of light machinery available in the country.

Table 105

The Central Government is responsible for the maintenance of all the National Highways throughout the country and for all roads other than National Highways in the Union Territory, all roads other than National Highways in states are the responsibility of state governments. The Central Government makes some provision year after year for the maintenance and improvement of state roads connecting two states or roads of economic importance.

⁽a) As on 31-3-1975

⁽b) As on 31-3-1974.

⁽c) As on 31-3-1973

⁽d) As on 31-3-1972.

⁽e) Maintained by Chief Engineer (Irrigation). Haryana.

⁽f) Maintained by Andhra Pradesh State Electrcity Board.

⁽g) Road lengths have been shown as nil as the same have been included in PWD Roads and are being maintained by the Public Works Departments.

^{*}The decrease in surface road lengths during the year 1975-76 is due to the fact that the State Governments, reviewed, revised or upgrade Road lengths and handed over to the PWD for maintenance.

20. SHIPPING

This section presents tables relating to the strength and tonnage of Indian merchant shipping. The data on strength of the fleet covers ships registered under Merchant Shipping Act, 1958 and the source for the data is the Directorate General of Shipping. The basic source of data for shipping traffic is the respective Port Authorities of Indian Ports. These data are collected and published by the Transport and Research Division of the Ministry of Shipping and Transport and also by the Directorate General of Commercial Intelligence and Statistics.

Table 106

This table shows the strength of Indian Merchant shipping fleet plying for the coastal and overseas trade for relevant twelve years. The type-wise break-up of the fleet into passenger vessels, tankers and dry cargo vessels is also given for the latest year.

Table 107

This table presents the total (imports, exports and total) overseas cargo handled at the major and minor ports of the country and those handled by Indian flag vessels. Cargo carried to/from a foreign port is recorded as overseas cargo. For the latest year, the break-up of the world into those carried by each major port and total of all minor ports is also given.

Table 108

This table provides the data regarding number and Net Registered Tonnage (NRT) of vessels which entered and cleared with cargo and in ballast by type of vessels namely steam and sailing. Net Registered Tonnage is defined as the net volume of enclosed space of vessels less crew space, engine room and other space not used for cargo.

Tables 109-110

These tables respectively present data regarding the number and Net Registered Tonnage of Vessels which entered Indian Ports and which cleared from Indian Ports with cargo and in ballast by nationality of vessels.

Tables 111-112

These tables present the data regarding the number and Net Registered Tonnage of vessels which entered and cleared with cargo and in ballast respectively by nationality of vessels in coasting trade.

Table 113

This table provides data relating to the number and Gross Registered onnage of steamers and vessels (sailing) in foreign and coasting trade handled by major ports in India. Gross Registered Tonnage (GRT), is defined as the entire internal cubic capacity of a ship. The unit for measurement of GRT is a ton of 100 cubic feet.

Table 114

The table includes data relating to Gross Tonnage of Imports and Exports in coastal and foreign trade by major Indian ports.

Notes:

Figures in brackets indicate the percentage of the respective items under the cargo carried.

II. Minor and intermedicate port traffic is included only from 1964-65 onwards.

III. Bunker traffic at ports is excluded from 1965-66 onwards except for Bombay.

IV. Sailing Vessels traffic is excluded.

21. CIVIL AVIATION

This section presents tables relating to revenue traffic carried by Indian operators, namely Air India and Indian Airlines (IA). These two Corporations came into being in August 1953 on nationalisation of air transport in India. Indian Airlines operates on routes inside India and on international routes to adjacent countries while Air India operates mainly on international routes. The data for domestic and international services have been shown separately. For ensuring international comparability of data, the standards land down by International Civil Aviation Organisation (ICAO) have been adopted.

The source for these data is the office of the Director General of Civil Aviation, Ministry of Tourism and Civil Aviation, who publish them in their publication "India Air Transport Statistics.

Tables 115 & 116

Table 115 presents statistics relating to passengers and cargo traffic carried and operating revenue earned by the scheduled operations in domestic and international services separately. Table 116 presents similar data for Indian non-scheduled operations. Various technical terms used in these tables are defined below:—

- Hours flown—These figures present the total number of hours flown by planes carrying the revenue traffic.
- Aircraft Kilometres flown—These figures represent the total kilometres flown by planes carrying the revenue traffic.
- Tonne-Kilometres Available—The figures are obtained by multiplying the total tonnage effered to the public for air transportation of passengers, freight and mail by the kilometres flown.
- Passenger, Freight and Mail carried—The number of passengers carried represents the total number of passengers carried on different air-routes treating passengers travelling by planes for two or more routes as having performed two or more journeys. These figures relating to the weight of freight and mail carried are expressed in Tonnes.
- Passenger-Kilometres Performed—The figures are obtained by adding up the kilometres travelled by each passenger.
- Tonne-Kilometres Performed—Represents aggregates based on the product of the tonnage of freight or mail, as the case may be, and the distance through which the load was carried. The figures relating to total load tonne kilometres take into account all kinds of traffic including passengers.
- Passenger Load Factor—Represents the percentage of passenger kilometres flown to the seat kilometres available.
- Weight Load Factor-Represents the percentage of tonne kilometres performed (passenger, freight & mail) to the tonne-kilometres available.

22. TOURISM

Table 117

Foreign Tourists coming to India.

The Department of Tourism has adopted the following definition as per recommendation of "U.N. Conference of International Travel and Tourism, Rome, 1963".

A foreign tourist is a person visiting India on a foreign passport staying at least twenty-four hours in India and the purpose of whose journey can be classified under one of the following headings:—

- (i) Leisure (recreation, holiday, health, study, religion and sport);
- (ii) Business, family, mission, or meeting.

The following are not regarded as 'foreign tourists'.

- 1. Persons arriving, with or without a contract, to take up an occupation or engage in activities remunerated from within the country;
- 2. Persons coming to establish residence in the country;
- 3. "Excursionists", i.e., temporary visitors staying less than twenty-four hours in the country visited (including travellers on cruises).

Statistics in this publication do not include the following:-

- 1. Nationals of Pakastan and Bangladesh.
- 2. All foreigners entering India from Bhutan by land.

⁽a) Included in West Germany.

This section presents operating and financial data relating to the different branches of the Posts and Telegraphs Department, including the Post Office Savings Banks. This comprises statistics of the number of offices and the length in kilometres of telegraph lines as well as the volume of traffic handled by those offices and or sents over the wires. It is possible with these data to make a study of the growth of traffic against the back-ground of expansion of facilities and vice versa. These data are collected by the Director-General of Posts & Telegraphs, Ministry of Communications and are published in their Annual Report and the Statistical Digest.

Table 118

This table provides the general all India statistics of post offices, namely, number of post offices, letter boxes, postal articles, money orders, etc. These table also provides data regarding the total strength of establishments and length of railways, roads etc. over which the mail was carried.

Table 119

This table presents estimated number of post cards, letters newspapers, parcels and packets handled by the post offices. The table also presents the actual number of registered, insured and value payable articles. In the case of unregistered postal traffic, it is not possible to maintain day-to-day statistics of the actual number of articles handled by the post offices. The number of unregistered articles is therefore, estimated from a count of articles in all post offices in India taken during the one week in February (representing busy season) and one week in August (representing slack season).

Table 120

This table, in addition to all India totals for earlier years presents circle-wise information for 1976-77 regarding number of post offices, letter boxes, postal articles, etc. Table 121

This table as in table 120 provides circle-wise and all India information regarding number and amount of money orders issued and paid. The data for Indian and foreign money orders are shown separately.

Table 122

This table presents number of post offices, savings banks, depositors and amount deposited and withdrawn.

Table 123

This table provides data regarding receipts and expenditure of Post Offices by heads. Receipts under postage include both sale of stamps and postage paid in cash, i.e.,—(i) postage prepaid in cash in post offices, (ii) credits afforded in the schedule of customs duty on account of postal redirection fees and insurance fees realised on delivery of inward foreign parcels, (iii) charges for resetting franking machines, and (iv) cash realised for unpaid or insufficiently paid postal articles.

Table 124

This table presents the figures of expenditure of post offices under capital account.

Tables 125-127

These tables respectively show summary statistics regarding telegraph lines, telephone lines and telephone offices.

Tables 128-129

These tables show data relating to paid telegraphic messages and telegraphic offices respectively.

Table 130

This table presents data regarding the number of radio messages received and sent. Radio telegrams include only the messages sent to ships from coastal offices.

Tables 131-132

The general financial results of the Telegraph Department are presented in table 131 and those of posts and Telegraph Department are shown in table 132.

24. LABOUR

This section presents data in respect of employment, wages and earnings, industrial disputes, industrial injuries and labour training.

Attempts have been made to cover statistics regarding employment both under the public and private sectors as far as figures are available.

Table 133

This table relates to all escablishments under Central Government, State Governments, Quasi Government organisations and Local Bodies. The information is based on the data collected by the Employment Exchanges as part of their programme for collection of Employment Market Informat on on quarterly basis. The information on the number of persons employed at the end of every quarter is compiled by the Directorate General of employment & Training through the Employment Market Information (EMI) Programme. The programme provides for collection, among other things of employment data in the organised sector, i.e., the entire public sector and non-agricultural establishments employing 10 or more workers in the private sector. The data from the private sector establishments employing 25 or more employees are collected under the employment Exchanges (compulsory Notification of Vacancies) Act 2959. The rest (10-24 workers) are being collected from March, 1966 onwards voluntarily from the employers. The non-response is generally small but employment in such establishments is estimated by the local Employment Officers on the basis of data furnished for previous quarters and included in the overall estimate of employment.

The main changes in coverage are as follows:—Figures in respect of the Union Territory of Goa, Daman & Diu are included from March 1970 onwards and those for Mizoram from March 1975 onwards. The 1971 figures for Manipur have been repeated in later years but excluded from March 1975 due to non-receipt of data. Again from March 1977, the data in respect of Manipur have been included. The figures do not cover Nagaland, Arunachal Pradesh, Andaman & Nicobar Islands, Lakshadweep, Dadra & Nagar Haveli, and Sikkim as the EMI data collection programme has not so far been extended to these States/Union Territories. From 1975, data are based on the National Industrial Classification (NIC)—1970.

Table 134

This table relates to employment in Railways. As the regrouping of Government Railways was completed on 14th April 1952, zone -wise information regarding employment in Railways is available only from that year. Information regarding employment in Production Units includes, Chittaranjan Locomotive Works and Integral Coach Factory from 1955 and Diesel Locomotive Works, Dandakaranya-Bolangir-Kiriburu Railway Project from 1961 and Railway Electrification Project from 1966 onwards. The employment in Ganga Bridge Project which was shown under Works and Projects (Production Units) prior to 1960-61 is now shown under Eastern Railways as this Project was merged with Eastern Railways with effect from 1960-61 and the employment, in Dandakarnya-Bolangir-Kiriburu Railways Project and Railway Electrification Project which were shown under Works and Project (Production Units) upto 31-3-1968, is now shown under South Eastern Railway as these projects were merged with the South Eastern Railway with effect from 1-11-1968. Besides, employment data for Non-Government Railways and for Railway Board, other Railway Offices including Metropolitan Transr port Project (Railways) are also given in this table. The employment data include class I to IV permanent and temporary employees.

Tables, 135A 135B 135C & 135D

The statistics in these table relate to factories as defined under the Factories Act, 1948. This Act covers factories employing 10 workers or more with the aid of power, 20 workers or more without the aid of power and factories specially brought under the purview of the Act of by the State Governments. The statistics of employment relate to persons employed, directly or through any agency, whether for wages or not, in any manufacturing process, or in cleaning any part of the machinery or premises used for a manufacturing process, or any other kind of work incidental to or connected with the manufacturing process or the subject of manufacturing process. Thus the definition of 'worker' as laid down in the Act does not cover manual workers alone but some clerical and supervisory personnel as well.

The employment figures represent "average daily employment". The figure of average daily employment are furnished by each factory by dividing the total attendance (Man-days worked) during a year by the total number of working days during the year. Thus, the measure of employment is based on actual attendance and not on the physical number of persons on roll. In the case of non-responding factories estimated figures have been given. The reported or estimated figures of average daily employment for all factories belonging to an industry group or a State are summed up to obtain the total average daily employment for an industry group or a State.

The data for 1951 relate to the former Part 'A', 'B' and Part 'C' States. Data from 1956 onwards relate to re-organised States and Union Territories and include estimated information relating to employment in factories not submitting returns whereas earlier figures relate to factories submitting returns only.

Data for 1956 exclude Manipur and Jammu & Kashmir and those for 1961 and 1962 exclude Jammu & Kashmir only.

Figures for 1956 onwards have been demarcated by a deep line in order to indicate non comparability with earlier figures.

Table 135A presents industry-wise figures of employment in Government and Local Fund factories and in other factories. In this table, figures up to 1970 are based on the old classification of industries. As the figures for the years 1971 onward are being built up for the groups of industries according to NIC 1970, these figures have been given against the group of industries under old classification onsidered nearest to the new group.

Table 135B provides Statewise data for total employment in all factories.

Tables 135 C and 135D present data regarding employment in factories according to the NIC 1970. Table 135C provides all-India figures upto 3 digit-level as per NIC-1970 for the years 1971 onward and table 135D gives Statewise data according to major groups of industries for the year 1975.

Average daily employment in factories according to three broad age-categories and sex is shown in this table. The information relates to only factories submitting returns. The Factories Act, 1948 defines adult, adolescent and child, as follows:

- (i) Adult is one who has completed 18 years.
- (ii) Adolescent is one who has completed 15 years but not 18 years.
- (iii) Child is one who has not completed 15 years (children below 14 years are not permitted to work).

Table 137

This table presents estimated average daily employment in 'Working Factories' using power. The factories employing 10 or more workers and using power are covered under section 2m(i) of the Factories Act, 1948. The statistics presented in the table refer to the set of factories registered under this section.

Table 138

This table provides estimated employment in generation, transmission, and distribution of electric energy. The information on the number of persons employed at the end of every quarter is compiled by the Directorate General of Employment and Training through the Employment Market Information (EMI) Programme, details of which are given about under notes to table 133.

Table 139

The table gives information regarding average daily number of workers employed in mining. The mineral-wise break-up of employment in mines is given for 12 important minerals. The method of computation of average daily number of workers employed is the same as given above for tables 135A, B, C&D. Under the statutory provisions of Mines Act, 1952 the Director General of Mines Safety collects information regarding number of persons employed in mines and quarries (except those specially exempted by Central Government). Upto 1951, the information regarding employment in mines was collected under the Indian Mines Act, 1923 and thereafter it was collected under the Mines Act 1952. The scope of the Act changes slightly from time to time. For example, by a Notification of March 1955, a number of hitherto exempted stone, lime-stone and sand excavations were brought under the provisions of the Act. The provisions of the Act were extended to the State of Jammu & Kashmir from the 15th August, 1968.

Table 140

This table shows the average daily number of persons employed in tea, coffee and rubber estates. The Directorate of Economics and Statistics, Ministry of Agriculture & Irrigation collects figures of employment from coffee and rubber estates every year through State Governments. The data for employment in tea plantations are based on the publication, "Tea Statistics" published by the Tea Board. The data for coffee plantations and rubber plantations are supplied respectively by the Indian Coffee Board and the Indian Rubber Board. All workers in garden and outside, are covered. According to instructions laid down, each estate furnishes figures of 'average daily employment' by dividing the total man-days worked during a year by a standard figure of 300 working days. The figures of 'average daily employment' for individual estates are added up to obtain the 'average daily employment' for each industry viz., tea, coffee and rubber.

Table 141

Statistics of employment in respect of shops, commercial establishments and restaurants, registered under the Weekly Holidays Act, 1942 or Shops and Commercial Establishments Acts in the various States are given in this table. These Acts are in force only in certain urban areas, covering municipal

areas, towns and cantonments, and hence the statistics are limited to shops and commercial establishments in such areas. The employment data are compiled by the State authorities either from the annual returns or from the figures furnished by the employers at the time of registration of the unit under the Act. In some cases the figures are collected specially by the Inspectors appointed under the Acts directly from the individual establishments. The number of shops may be more than the number of workers employed therein due to the fact that shops not employing any workers but run independently by the owners themselves are also covered by the Act.

Tables 1424-142B

These tables show the number of applicants on the live register of Employment Exchanges. The Employment Exchanges which are under the control of the Director General of Employment and Training. Ministry of Labour, register names of the persons seeking employment and help them to secure employment. Table 142A gives all-India figures for the period 1960—1973 by broad occupational groups based on old classification (National classification of occupation—1960) and table 142B provides State-wise data based on revised National classification of occupation, 1968 for the year 1977 and all-India figures for 1974 to 1977.

Table 143A

This table gives the number of applicants placed in employment through the employment exchange according to type of establishments namely (i) Central Government (ii) Union Territory Administration (iii) State Government (iv) Quasi Government & Local Bodies (v) Other establishments.

Table 143B

This table presents the data regarding the number of applicants placed in employment through employment exchanges by category of applicants, namely (i) Ex-service men (ii) Displaced persons (iii) Bangaladesh Migrants (iv) Women (v) Scheduled Castes & (vi) Scheduled Tribes.

Tables 144-146

These tables present data about wages and earnings of factory workers in India. The data are collected under Payment of Wages. Act, 1936 and relate to factories defined under clause (m) of section 2 of the Factories Act, 1948. Earnings include basic wages, dearness allowance, over-time payment, other cash allowances including production or incentive bonus, efficiency bonus, money value of concessions, annual or prepaid bonus and arrears. Prior to 1st April 1958, the Payment of Wages Act, 1936 was applicable only to employees earning less than Rs. 200 per month. With the enforcement of the Payment of Wages (Amendment) Act, 1957 with effect from the 1st April 1958, the scope of the Act has been extended to cover persons earning more than Rs. 200 but less than Rs. 400 per month. Acceptable returns for this revised wage group were received only from 1961. The information regarding both the wage groups for the years 1961 to 1964 was published in the 1967 issue of this publication. The data from 1965 onwards are being collected for the workers in the revised wage group only.

Table 144 gives State-wise data regarding total annual earnings of factory workers. Figures in this table exclude information about railway workshops but include that for defence installations. Tables 145 and 146 present per capita annual earnings of factory workers respectively by States and by industries. The earnings of workers in the seasonal industries which comprise Food, Beverages, Tobacco, Gins & Presses are excluded from those presented in these two tables.

Table 147

This table presents wages and earning of mining labour in non-coal mines. The data for coal mines relate to average weekly earnings of miners & loaders in December each year, whereas those for other mines relate to average daily earnings of miners & loaders in December each year. The average weekly cash earnings in coal mines are computed by dividing the total payments during any complete working week in the month of December by the average daily attendance during that week. Upto 1965 the average daily earnings for mines other than coal were computed by dividing the total payment for December by the corresponding aggregate daily attendance. From 1966 onwards these are computed by dividing the earnings in the month of December for a week by six.

Table 148

This table gives statistics of injuries in factories. Under the Factories Act, 1948, statistics of industrial accidents due to which affected persons are prevented from attending to work for a period of 48 hours or more, immediately following the injury, are required to be reported to the Factory Inspectors. For statistical purposes, the number of injuries is given by the number of persons receiving injuries as a result of an accident and this number is more than the actual number of accidents because one accident may result in injuries to more than one person. The data on injuries presented in the table relate only to factories submitting returns. No estimates of injuries can be made for the defaulting factories. The incidence rate of injuries is calculated by dividing the total number of injuries by the corresponding number of workers employed in the factories submitting returns.

Table 149

This table shows number of accidents and number of injuries (i. e., number of persons receiving injuries) in Mines. The data are collected under the Mines Act. Accidents have been classified into fatal and serious. A serious bodily injury is one which involves, or in all probability will involve, permanen loss of or permanent injury to any limb, or permanent loss of or injury to sight or hearing and fracture of any limb enforcing absence of the injured persons from work for a period exceeding 20 days. Complete statistics of minor injuries are not available. Data from 1951 to 1967 cover whole of the Indian Union except Jammu and Kashmir.

Table 150

This table shows the State-wise distribution of number of disputes, workers involved and number of man-days lost on account of industrial disputes resulting in work-stoppages. The data are collected on a voluntary basis by the State authorities and the Regional Labour Commissioner, (Central) who furnish consolidated returns to the Labour Bureau. The figures of number of workers involved relate to the maximum number of workers involved on any day during the course of work stoppage as knowns upto the date of reporting. The figures of man-days lost are calculated by adding up actual vacancies caused by the work-stoppage on each working day. Scheduled holidays during the period of work stoppage are not taken into account in the calculation of man-days lost.

Table 151

This table shows all-India figures of industrial disputes by causes of disputes.

Table 152

The data included in the table relate to compensated injuries under the Workmen's Compensation Act, 1923 and are based on annual returns received under the Act from State Governments, Posts and Telegraphs, and the annual report of the Railway Board. The information in respect of Railways relate to financial year from the year 1967 onwards. Under the Act, compensation is payable to workers employed in scheduled employment and drawing upto Rs. 500 per month for injuries due to accident resulting in death or disablement for more than 3 days provided that it is not caused through the fault of the worker himself. With effect from 1st October, 1975 the wage limit for coverage of workmen under the Workmen's Compensation Act has been raised from Rs. 500 to Rs. 1000 per month. As all the injuries are not compensated, the number of compensated injuries does not reflect the total number of injuries occurring. Further, many of the establishments covered by the Workmen's Compensation Act fail to submit returns and hence, information received by the State Authorities about the number of compensated injuries and the amount of compensation paid, is incomplete. In establishments covered by the Employees State Insurance Act, compensation in respect of injuries is paid under that Act and not under the Workmen's Compensation Act. This limitation affects the trend and comparability of the statistics of compensated injuries.

Table 153

The table shows number of training institutes, centres and trainees, etc. The data regarding trainees are given by States/Union Territory and by engineering & non-engineering trades. Thus the table shows progress of the labour training sponsored by the Ministry of Labour.

Table 154

This table presents data on employment in insurance. The information upto the year 1974-75 was collected by the Central Statistical Organisation, Department of Statistics. For 1975-76, the information has been furnished by the Ministry of Firance in respect of Life Insurance Corporat on and General Insurance Corporation but this excludes four State insurance companies which account for less than half a percent of total employment in the insurance sector.

Table 155

The table presents data on the number of banks and number of persons employed in the banking sector separately in respect of scheduled and non-scheduled banks and in regional rural banks and in The Reserve Bank of India. Information is collected by the Reserve Bank of India.

Tables 156A & 156B

These two tables give the number of persons employed in Ports in India. Table 156A gives the staff-strength in major, minor and intermediate ports.

Table 156B shows the data regarding number of dock workers registered with Dock Labour Board at major ports. The source of information for these tables is the Ministry of Shipping & Transport.

⁽¹⁾ There may be slight differences in totals due to rounding off the figures. From 1956 onwards, the data also include the estimated employment for factories not submitting returns. Rough annual estimates of average daily employment for States not submitting returns were 31 thousands for 1956 and 10 thousands for 1961. For 1971 figures are based on NIC-1970.

⁽a) Includes Paper and Paper Products.

⁽b) Included under Textiles.

⁽c) Includes beverages,

²²⁻¹⁷⁴ C.S.O./ND/79.

⁽¹⁾ The figures include estimated employment for non-responding units. Upto and including March 1965 it covers all establishments in the public sector and non-agricultural establishment employing 25 or more workers in the Private sector. Commencing from March 1966 it covers all establishments employing 10 or more workers in the private sector. For detailed notes on scope coverage please see the general descriptive notes to tables 134, 139 at the beginning of the section.

⁽a) Starting 1975, the data are based on National Industrial Classification (N.I.C.), 1970. 24-174 C.S.O./ND/79.

Ministry of Shipping & Transport,

⁽b) For 1969-70.

⁽b) Workers in respect of administrative body only.

25. TRADE UNIONS

Tables 157-160

Figures given in this section are based on the annual returns relating to financial years received from the State Governments and Union Territories under the Indian Trade Unions Act, 1926 up to the year 1964-65; and from the year 1965, the returns are being received on a calendar year basis. However, the statistics for the year 1965 relate to the nine month period April to December 1965. The Act applies to the entire Indian Union except Jammu and Kashmir, which has a separate Act known as the Jammu and Kashmir Trade Unions Act, 1950. The figures relating to the period 1951-52 to 1961-62 do not include Manipur, Lakshadweep, and from 1962-63 onwards do not include Lakshadweep.

The statistics relate to only those unions which have been registered under the Act. It is not obligatory on trade unions to secure registration under the Indian Trade Unions Act. Even among registered unions, about 47 per cent of them fail either to submit their annual returns as required under the Act or submit defective returns to the State Authorities, which are left out from the consolidated return furnished by the State Governments to Labour Bureau. The coverage of the statistics (e.g. memberships finances, etc. is, therefore, incomplete and varies from year to year. Data regarding unregistered union are not available.

Table 157—Number, Membership, Income, Expenditure and Funds of Registered Trade Unions

26. PRICES

This section presents statistics of the following items relating to prices.

- (i) Index number of Wholesale prices;
- (ii) Index number of Consumer prices for
 - (a) Industrial workers
 - (b) Urban Non-manual employees, and
 - (c) Agricultural labourers;
- (iii) Index number of Security prices;
- (iv) Spot prices of gold and silver at Bombay.

The index number of wholesale prices are computed by the office of the Economic Adviser to the Government of India, Ministry of Industry. They have, on the recommendation of the Working Group, set-up for the purpose, revised the series from base 1961-62=100 to base 1970-71=100. The scope coverage and method of computation of the revised series are described in their monograph 'A note on the Revised Index Numbers of Wholesale Prices in India (1970-71=100)'.

The consumer price index numbers for industrial workers and for agricultural labourers are computed by the Labour Bureau, Ministry of Labour and are published in their monthly publication 'Indian Labour Journal' and annual publication 'Indian Labour Statistics'. The index numbers of security prices in India are computed by the Reserve Bank of India and are published in their monthly publication 'Reserve Bank of India Bulletin'.

Table 161

This table presents revised series of index numbers of wholesale prices with base 1970-71=100. A brief description of the scope, coverage and the method of computation of this series is given below:—

Coverage: The revised series contains 360 commodities as against 218 (as re-defined) in the existing series. Owing to increasing sophistication of industrial production, some of the specifications of the existing series have been treated as items in the revised series with the result that the number of commodities included in the existing series have been shown as 218 instead of the present number of 139 in the existing series for comparing it with the revised series. The criteria adopted for the selection of non-agricultural commodities are that: (a) a large number of new industrial items should be included to reflect the strides made by the country in the industrial field, (b) items with a total value of production of more than Rs. 1 crore as per 1965 ASI data should be included, and (c) items of which indigenous output was small but had substantial imports should be included. Actual selection of industrial items has, however, been based on the response of the principal manufacturers and associations in the matter of furnishing relevant price data.

The number of quotations included in the new series stand at 1275 as compared to 767 in the previous series. Thus 508 additional quotations have been included in the revised series. Most of the additional quotations pertain to new industrial items added in the index. The number of quotations under 'Manufactured products' has increased from 404 in the existing series to 842 in the revised series.

As far as possible, specifications and markets for the existing quotations have not been changed unless the specification is no longer representative of the commodity.

System of classification: In the previous series (base 1961-62=100) commodity classification was based on the Standard International Trade Classification with slight adjustments to suit Indian conditions. In the revised series the Standard Industrial Classification has been adopted to bring about greater uniformity with the classification adopted in some other important indices like Index of Agricultural Production and Index of Industrial Production and also to facilitate comparison of trends in the wholesale price index with trends of comparable groups and sub-groups of other indices.

In the new classification, commodities are distributed under three major groups viz.

- II. Primary articles,
- II. Fuel, power, light and lubricants,
- III. Manufactured products,

- The major group 'Primary articles' comprises three groups (i) food articles, (ii) non-food articles and (iii) minerals. In other words, the major group 'Primary articles' is broadly comparable with two groups of the previous classification, viz. 'food articles' and 'industrial raw materials' with certain minor adjustments. Sub-groups such as (a) edible oils, (b) sugar, gur and allied products', (c) processed food and salt which were being included in the 'food articles' under the previous classification are now being shown in the group 'food products' of the major group 'Manufactured products' as per the Standard Industrial Classification. Like-wise, raw tobacco which featured in the 'liquor and tobacco' group under the previous classification is being shown under 'non-food articles'. The non-food articles, consist of commercial crops and other primary products which go for further processing.
- The major group 'Fuel power, light and lubricants' in the revised series consisting of coal, coke, lignite, mineral oils and electricity is broadly comparable with the group 'Fuel, power, light and lubricants' of the existing series except that the revised series excludes castor oil and rectified spirit which have been included, under the major group 'Manufactured products' in the revised series.
- The major group 'Manufactured products' contains 11 groups under which semi-manufactured and manufactured products have been classified. In the existing classification, the group 'Manufactures' was divided into two sub-groups (i) intermediate products and (ii) finished products.
- In the case of agricultural commodities the value were arrived at on the basis of statewise all India average harvest prices or average whole sale prices. In the case of minerals, value refers to the sale value of minerals at mine site. For petroleum products, quantity was valued at net delivered rate exclusive of sales tax and dealers' commission. Value of manufactured products represented ex-factory value for sale. Products consumed for further manufacture in the factory were excluded.
- The allocation of weights among different commodities, sub-groups, and groups within the major group 'Manufactured products' has however, been done on the basis of value of production (inclusive of excise duty and value of imports) during a single year 1968-69. Value of products as given in the ASI-68-census and sample sectors have been generally utilised for assigning weights. While assigning the value of production of groups, sub-groups and commodities necessary adjustments have been made by excluding the value of by-products from the main products and including them under the appropriate industry.
- Method of calculation: The revised Index also is a weighted arithmetic mean as the previous one. The price relatives are calculated as the percentage ratios which current price quotations bear to those prevailing in the base period. In other words the price-relative for each variety in a market is calculated by dividing the current price quotation by the corresponding base price (1970-71) and multiplying it by 100. The commodity index is arrived at as the simple arithmetic average of price relative of varieties or quotations in different markets. The sub-group, group and the index for the major group is derived as the weighted arithmetic mean of commodity indices. Like wise the all commodities index is computed as the weighted arithmetic mean of major group indices.
- Linking factor: The revised series of wholesale prices with base 1970-71=100 has been introduced from the first week of January, 1977. In order to maintain continuity in the index numbers of wholesale prices, it is usual to provide linking factors for the base period in respect of individual commodities, sub-groups, groups and the general index so that the revised series may be comparable with the previous one. The "office of 'the Economic Adviser had in the past used simple arithmetic conversion method. In this method, index figures in the old series corresponding to the base period of the new series provide the linking factor. If the index in the old series corresponding to the base period 1970-71 is say, 181.1 then 181.1/100=1.811 would be the linking factor. An index figure in the new index when multiplied by 1.811 would give the estimate of the index in the earlier series which is linked to the new.

Table 162

This table presents the consumer "price index 'number' for industrial workers on base 1960=100 by centres. The Labour Bureau is compiling the series in respect of 50 important centres (32 Factory, 10 Plantation and 8 Mining) selected from all over the country on the basis of their respective industrial importance in consultation with the various State Governments/Union Territories. The weighting diagrams for these centre indices were derived from the expenditure data available from the Family Budget Enquiries conducted among sampled working class households at each of the centres, during 1958-59 by following uniform procedure under the expert guidance of the Technical Advisory Committee on Statistics of

Prices and Cost of Living. The selection of markets, shops and outlets for the collection of retail price data at each of the centres, was made on the basis of their popularity among the working class population after making on the spot investigations in collaboration with the respective State Governments and representatives of employers and employees. The methodology adopted in the computation of 1960 based series was evolved after taking into consideration the prevailing international practice. For a detailed note on the scope and method of compilation of these series, reference may be made to the December, 1962 issue of the Indian Labour Journal. Indices, in respect of all the 50 centres are being published regularly in the Indian Labour Journal.

The linking factor for estimating the All India 1949 based series from the series based on 1960=100 is obtained by equating 100 in the 1960 based series to 121.54 in the old series (Base: 1949=100) in the case of General Index and to 115.74 in the case of Food Group Index. A reference may also be made to the October, 1968 issue of the Indian Labour Journal, for a detailed note.

Table 163

This table presents consumer price index number for urban non-manual employees based on the family budget survey of the non-manual employee population, carried out in 1958-59 at 45 selected urban centres of the country. A non-manual employee family for purpose of this survey was defined as one "which derived 50 per cent or more of its income during the reference month from the earnings of its members who are gainfully occupied as employees in a non-manual work in non-agricultural sector". The weighting diagram for the consumer price index at each centre was derived from the expenditure pattern of sample families falling in the income range of Rs. 100-750 per month. These indices measure the average change in consumer prices over time at a particular centre and cannot be used for the comparison of costliness of different centres. For details regarding scope and methodology, reference may be made to the August 1966 issue of the Monthly Abstract of Statistics, published by the Central Statistical Organisation.

Table 164

This table presents consumer price index number for agricultural labourers on base: 1960-61=100. This series on base: 1960-61=100 replaces the interim series on base: 1950-51=100 w.e.f. Sept., 1964. The weighting diagram is based on the results of the second All India Agricultural Labour Enquiry conducted by the National Sample Survey during August, 1956-August 1957. For details regarding scope and method of construction reference may be made to the November, 1964 issue of the Indian Labour Journal published by the Labour Bureau.

Table 165

This table shows the revised series of index number of security prices with base 1970-71=100. The series has been revised and the base period has been changed from 1961-62 to 1970-71 with effect from November 1973. The method of computation of the revised series is described below:

While the series with base 1961-62 was based on 578 scrips, the new series of index numbers of security prices is based on 606 scrips and is also compiled for four different types of securities viz. (1) Government and Semi-government Securities, (2) Debentures, (3) Preference Shares, and (4) Ordinary Shares. The selection of ordinary shares is based upon their activity in the market and the importance of the company as indicated by the size of market value of the share capital of the company. The method of weighting used for the new series is similar to the one adopted for the old series. Weights are allocated in proportion to the amounts outstanding as on March 31, 1971, in respect of Government and semi-Government Securities and to the total average market value of outstandings share capital in the case of Debentures, Preference Shares and Ordinary Shares. The indices are calculated from the weekly average prices for selected scrips. For details regarding new series with the base 1970-71=100 reference may be made to the article published in the November, 1973 issue of the R.B.I. Bulletin.

Table 166

This table presents spot prices of gold and silver at Bombay based on quotations supplied by the Bombay Bullion Association Ltd. Yearly prices are the highest/lowest quotations during the financial year while average prices are worked out from the closing quotations for working days. The nominal quotations for gold and silver are also included while compiling the figures.

(1) Relate to Gold Bullion upto August 27, 1963, 14-Carat
Gold upto November 9, 1966, and to Standard Gold from July 10, 1967.

- (2) Prices of Silver relate to .996 fineness.
- (*) Average of closing quotations for working days.
- (*) Highest/lowest during the period.

The tables presented in this section give the estimates of net national product (i.e. national income) of India, obtained by applying inventory method to as many sectors of the economy as possible; the income method being followed for the remaining sectors. The tables 167 to 170 included in this section present the revised series of national product giving the estimates of net national product at factor cost known as 'National Income', at current and constant (1970-71) prices. The methodology and estimation procedure are explained in the 'Brochure on Revised Series of National Product for 1960-61 to 1964-65' and various issues of the 'National Accounts Statistics, issued by the Central Statistical Organisation.

Tables 167 & 168

The estimates of net and gross national product at current and at 1970-71 prices are shown in these ables.

Tables 169 & 170

The estimates of net domestic product at factor cost by industry of origin at current and 1970-71 prices are given in tables 169 & 170 respectively.

Tables 171 and 172

The estimates of private final consumption expenditure at current and at 1970-71 prices are shown in these tables.

Table 173

Domestic saving (at current prices): The table presents estimates of saving by household sector, private corporate sector and public sector.

Table 174

Domestic capital formation by type of assets (at current prices): The table presents estimates of capital formation by public and private sectors. These estimates are prepared by the commodity flow approach separately for construction machinery & equipment and changes in stocks.

Table 175

Domestic capital formation by type of assets (at 1970-71 prices): The table presents estimates of capital formation.

Table 176

Factor incomes by broad sectors (at current prices): The table presents the factor incomes by broad sectors. The factor incomes have been classified into (i) compensation of employees, (ii) interest, (iii) rent, (iv) profits and dividends, and (v) mixed income of self employed. The last category covers income of own account workers as well as profits and dividends in un-incorporated enterprises.

Table 177

Performance of public sector (at current prices): The table presents the estimates of (i) net domestic product, (ii) net domestic saving, (iii) net domestic capital formation, and (iv) final consumption expenditure for the public and private sectors and also indicates the percentage share of public sector in each of the aggregates.

[†] Unadjusted for errors & omissions.

The tables contained in this section, show the Budgetary position of Central Government & State Governments and economic classification of the Central Government Budget.

Tables 178-181

These tables respectively show the Revenue and Capitals receipts and expenditure of the Central Government and State Governments. Since the data presented in these tables are in conformity with the revised classification of the various heads, they are not comparable with those presented in earlier issues of the Statistical Abstract.

Table 182

The table gives a summary statement of the revenue and the expenditure on revenue account of Central and State Governments. Revenue comprises proceeds from taxation and other receipts classed as revenue, excluding borrowings, small savings, foreign aid, etc. The expenditure met from the revenue is treated as expenditure charged to revenue. The net result of above transactions represents the surplus or the deficit for the year on revenue account. The table presents data for the Central Government and those States which correspond to the reorganized set up.

Tables 183-186

Detailed figures of receipts and expenditure respectively on collection of customs, union excise duties, corporation tax and taxes on income other than corporation tax have been given in these tables. The figures for these tables have been collected from the office of the Comptroller and Auditor General. For details regarding the scope of each item of account for which data are presented, the publications 'List of Major and Minor Heads of Account of the Central and State Governments' Receipts and Disbursements' may be consulted.

Table 187

Ever since 1957-58 an economic classification of the Central budget is being prepared by the Economic Division of the Ministry of Finance. The system of Accounts given in this table analyses various aspects of the Central Government's transactions vis-a-vis rest of the economy. Some of the significant magnitudes emerging from the analysis are:

- (a) The Central Government's total expenditure;
- (b) The Central Government's final outlays;
- (c) Capital formation out of the budgetary resources of the Central Government;
- (d) Net Capital formation and savings of the Central Government;
- (e) The various measures of deficit in the Central Government's budgetary transactions; and
- (f) Income generation by the Central Government.

B.E.: Budget Estimates.

Note: —The data from 1973-74 onwards given in Tables 176 and 177 are not strictly comparable with those for earlier years due to changes in budgetary classification adopted since 1974-75. However, the overall position remains unchanged.

- (1) Excluding Treasury bill receipts.
- (2) Excludes conversion of ad-hoc treasury bills of Rs. 500 million in 1965-66, in Rs. 1,000 million each in 1973-74, 1974-75, 1975-76, 1976-77 and 1977-78 (revised estimates) to dated securities.
- (3) Mostly sold to R.B.I.
- (a) Excludes the transfer of Rs. 4,211 millon on account of Centre's assistance to States for clearing their overdrafts with the R.B.I.
- (b) Excluding PL 480 transactions under INDO-US Agreement, 1974.
- (†) Including effects of budget proposals and adjusted for the effects of tax concessions announced on April 27, 1978 and supplementary demands for grants presented to the Lok Sabha on August, 1978. Figures in brackets exclude the effects of additional resource mobilisation measures.

Includes sale proceeds of gold from first six auctions held by R.B.I.

R.E.: Revised Estimates.

B.E.: Budget Estimates.

- Including effects of budget proposals and adjusted for the effects of tax concessions announced on April 27, 1978.
- (a) Since break down of items like capital outlay on general economic services, scientific services and research, housing and urban development, social security and welfare are not available separately upto 1971-72 they have been included under this head.
- (b) Comprise capital outlay on all services and write backs to revenue.
- (c) Excludes the transfer of Rs. 4,211 millions on account of Central assistance to States for clearing the overdrafts with the Reserve Bank of India.
- (d) Excluding PL 480 transactions under Indo-US Agreement, 1974.
- (e) The figures relating to these items are included under 'other economic services' since the break down is not available for the period 1965-66 to 1971-72.
- (f) Since the break down of the item into developmental and non-developmental is not available, the outlay is included under 'others' in non-developmental Capital outlay.

Notes:

Source: Reserve Bank of India.

- I. Budget estimates for 1977-78 include estimated yield from States' Budget Proposals and the States' share in Centre's additional taxation. Figures in brackets reflect 1976-77 rates of
- II. Figures in brackets for 1972-73 in respect of capital receipts excludes Rs. 4,211 millions special "ways and means" assistance given by the Centre to the States to clear their outstanding overdrafts with the Reserve Bank of India as at the end of April 1972. Surplus on capital account and overall surplus/deficit are accordingly adjusted. Net increase or decrease in "ways and means" advances is also adjusted for Rs. 4,211 millions as this repayment was financed by special assistance from the Centre.
- R.E: Revised Estimates.
- B.E.: Budget Estimates.
- (a) Excluding ways and means advances and temporary overdrafts from the Reserve Bank of India and purchase/sale of securities from cash balance investments Account.
- (b) Inclusive of overdraft of Rs. 72 millions and Rs. 2 millions in 1973-74 and 1974-75, respectively and repayment of overdraft of Rs. 12 millions in 1977-78 by Jammu and Kashmir Government to Jammu & Kashmir Bank Ltd.
- (c) Includes the effect of saving of Rs. 20 millions due to reduction in PWD stock which the Government of Himachal Pradesh has treated as additional resource mobilisation.
- (d) This deficit would go up by Rs. 772.7 millions if (1) supplementary demands for Grants of Rs. 32.7 millions in the case of Haryana and second supplementary demands for grants of Rs. 198.6 millions in the case of Maharashtra and (2) unbudgeted outlay of Rs. 541.4 millions in the case of Assam, Bihar, Haryana, Kerala and Punjab are taken into account,

Source: Comptroller and Auditor General of India.

⁽¹⁾ Upto the year 1963-64, these duties were credited under three distinct sub-heads in the accounts i.e. Sea Customs, Land Customs and 'Air Customs', but from the 1st April 1964, the duties are being accounted for under the Heads 'Imports', 'Exports', and 'Miscellaneous'. The figures for 1964-65 onwards are, therefore, for Customs and not for 'Sea Customs'.

⁽²⁾ Includes industrial fuels and other mineral oils from the year 1961-62.

⁽³⁾ Metals other than Iron and Steel, Silver and Block tin up to 1961-62.

⁽a) Included in 'Protective Duties'.

29. INCOME TAX

Statistics presented in this section relate to the Income tax assessments. The figures refer to regular assessments made under the Income-tax Act and do not include demands raised on provisional assessments to miscellaneous demands like penalties, interest, etc. Figures of taxes represent the demand raised and not the collections actually made against those demands. The Statistics for the years 1970-71 and 1973-74 are not given as these have been kept in abeyance for the present by the Directorate of Inspection.

Tables 188-189

These tables analyse the demand for Income-tax according to the different classes of assessees viz., (i) Individuals, (ii) Hindu Undivided Families, (iii) Unregistered Firms & Associations of persons, (iv) Registered Firms, and (v) Companies. The statements are designed to show the total tax demand (including surcharge) payable by assessees and net income left in their hands after payment of tax. The number of assessees shown are in respect of each assessment made on them and an assessee having more than one assessment made on him during the year is counted more than once. Table 186 presents All India series showing the figures according to various ranges of income assessed for the latest year 1976-77 and the data regarding total of all income-ranges for 10 years. Table 189 provides Statewise data for total of all income ranges for the year 1975-76.

Table 190

The table analyses the demand of income-tax during the year 1976-77 according to the category of income assessed and refunds and rebates allowed. Demand and refund involved in reassessments on account of rectifications, appeals, revisions, etc. are also given. An assessee having income from more than one source is included under each one of the sources from which the income is derived.

Table 191

This table presents amount of income-tax including surcharge payable in selected cases of income and its percentage incidence for the assessment year 1977-78.

Table 192

Income from "Business and Profession" and tax thereon for the year ending 31st March, 1977 is analysed in this table.

This section presents data on exchange and money rates, prices of bullion and government securities, coinage and currency. The sources of data regarding coinage are the Mint Masters of the Bombay and Calcutta Mints and for the other tables the Reserve Bank of India.

Table 193

This table provides data regarding Money Rates in India which are defined as the rates at which the various classes of banks in the country are prepared to discount or rediscount bills of exchange, to give loans and advances, or to accept deposits. Various money rates mentioned in this table are described below:

Reserve Bank of India

Bank Rate.—The standard rate at which the Reserve Bank of India is prepared to buy or re-discount bills of exchange or other commercial paper eligible for purchase under the Reserve Bank of India Act. The Reserve Bank's first official Bank Rate, viz., 3½ per cent was announced on July 4, 1935 and this rate remained unchanged till November 28, 1935 when it was lowered to 3 per cent. The Bank rate was changed to 3½ per cent on November 15, 1951, to 4 per cent on May 16, 1957 to 4½ per cent on January 3, 1963, to 5 per cent on September 26, 1964, to 6 per cent on February 17, 1965, to 5 per cent from the close of Buiness on March 2, 1968, to 6 per cent with effect from the close of Business on January 8, 1971, to 7 per cent with effect from the close of Business on May 30, 1973 and to 9 per cent with effect from the close of business on July 22, 1974.

State Bank of India

Hunti Rate. - The Rate at which the State Bank discounts first class three months commercial bills.

Advance Rate.—The Bank's prime lending rate which regulates all interest rates for the various categories and classes of advances granted by the Bank.

Call Loan Rate.—Basic advance rate at which the State Bank grants demand loans to scheduled commercial banks against Government securities. Call loans to co-operative banks against Government securities are granted at a rate lower than call loan rate to other commercial banks.

Other selected major scheduled commercial banks

Call Money Rate.—Relates to inter-bank advances repayable on call at the option of the lender. Deposits requiring prior notice of any type for repayment are not included while over-night deposits are included.

Bazaar Bill Rate.—Rate at which bills of small traders are reported to have been discounted by shroffs. These are unofficial quotations supplied by the State Bank of India.

Tables 194 & 195

Prices of Silver and Gold.—Relate to spot quotations showing highest, lowest and average prices of silver in London, New York and Bombay and of gold in Bombay. Average prices are the average of closing quotations for working days. The spot prices of gold relate to Mysore gold up to July 13, 1958, Abysinian gold from July 14, 1958 to July 31, 1959, gold bullion from August 1, 1959 to August 27, 1963, 14-carat gold thereafter up to November 9, 1966 and standard gold from July 10, 1967. Forward trading in gold was banned throughout the country with effect from November 14, 1962 and that in silver from January 10, 1963.

Tables 196

Number and value of coins minted.—Figures relate to coins minted by Bombay and Calcutta Mints These are supplied by respective Mint Masters. Indian mints have also minted coins for foreign countries like East Africa, Ceylon, Bhutan, Malaysia, Straits Settlements Iraq and Egypt, the figures for the number and value of which are shown in brackets. Coins have been, classified according to their metal content a described below:

Pure nickel.—Includes rupee, half rupee and quarter rupee coins. However, with the introduction of metric system, pure nickel 25 naya paise and 50 naya paise were first struck in 1957-58 and in 1960 respectively. This also includes I Rupee and 50 paise coins struck in 1964 (in English) and 50 paise only in Hindi in November 1965 in commemoration of Shri Jawaharlal Nehru and 1 rupee and 50 paise coins introduced in October, 1969 in commemoration of Mahatma Gandhi Birth Centenary.

Nickel Brass.—Includes one maya paisa coins from 1961-62 upto 1965-66 and then discontinued. Cupro-Nickel.—Includes 10 maya paise, 5 maya paise and 2 maya paise introduced on 1st April 1957.

This also includes 50 paise and 25 paise introduced in January, 1972 and 50 paise commemorative coins introduced on the occasion of the 25th Anniversary (Silver Jubilee) of India's Independence in August, 1972, in addition to 50 paise coins with development oriented designs introduced [on 15th August, 1973.

Bronze.—Includes single piece and one naya paise pieces. Naya paise coins were introduced on 1st April, 1957.

Aluminium Magnesium.—Coins of this metal were first introduced in 1964-65 and it includes I paisa 2 paise, 3 paise and 5 paise coins. I paisa coins were introduced in October 1965, 2 paise coins in July, 1965, 3 paise coins in October, 1964 and 5 paise coins in January, 1967 and 10 paise coins in October, 1971 and also including 10 paise "Development oriented Family Planning—Food for All" coins introduced from the 15th August, 1974.

The term 'Naya paise', was changed to 'Paise' from 1st June, 1964.

Aluminium Bronze.—Includes 10 paise and 20 paise coins introduced in December 1968. Also includes 20 paise coins introduced in October 1969 in commemoration of Mahatma Gandhi Birth Centenary and also to mark the 25th anaiversary of the Establishment of Food and Agricultural Organisation in October, 1970.

Silver-alloy—Includes 10 rupee coins introduced in commemoration of Mahatma Gandhi Birth Centenary in October, 1969 and to mark the 25th anniversary of the establishment of Food and Agricultural Organisation in October, 1970. This also includes 10 Rupee commemorative coins minted on the occasion of the 25th Anniversary of India's Independence in August, 1972 in addition to the denomination of Rs. 20 and Rs. 10 coins with development oriented designs introduced on 15th August, 1973.

Table 197

Total Notes and coins issued.—Figures in this table relate to the value of total notes and coins issued.

Notes of the denominations of Rs. 500, Rs. 1,000 and Rs. 10,000 were demonetised, in January, 1946. New high denomination notes for Rs. one, five and ten thousands were again issued from April, 1954.

Table 198

Statistics of Note Circulation in India. - Figures are as on the last Friday of March each year.

Notes in Circulation.—Comprise the notes held outside the Reserve Bank, i.e., by the public banks, treasuries, etc.

Gold coin bullion and foreign securities.—As required in Section 33(2) of the Reserve Bank of India Act, the aggregate value of the gold coin, gold bullion and foreign securities held in the Issue Department at any time should not be less than Rs. 200 Crores. Of this, the aggregate value of the gold coin and gold bullion should not be less than Rs. 115 crores

Foreign Securities.—Represents securities payable in the currency of any foreign country which is a member of the International Monetary Fund.

Rubse Coin.—Represents the face value of the whole rupees held at the offices of the Issue Department of the Reserve Bank of India and in currency chests at offices and branches of the Bank and its agencies and sub agencies including Treasury agencies. Since July, 1940, rupee coin holdings include one rupee notes issued by the Government of India under the Currency Ordinance, 1940. Mahatma Gandhi Centenary Ten rupee silver coins and World Food & Agricultural Organisation commemorative Ten Rupee Silver coins issued by the Government of India in October, 1969 and October, 1970 respectively are also included under rupee coin.

Government of India rupes Securities,—are securities of any maturity issued by the Central Government in respect of public loans and also include Government of India ad-hoe Treasury bills issued to the Reserve Bank."

31-174 C. S. O. (ND)/79

Table 199.

Money Supply with the Public.—Money Supply with the public comprises private holdings of currency demand deposits held by the public in banks and 'Other deposits' with the Reserve Bank. The series have been revised to (i) include small coins in circ ulation with the Public, (ii) adjust "Net demand" liabilities for inter-bank demand deposits and non-deposit other liabilities, and (iii) exclude from other deposits with Reserve Bank of India, Reserve Bank of India Employees' Provident Fund, Pension Fund, and Cooperative Guarantee Fund. However, no adjustments have been made for the net inward or outward movements of currency. Data from August, 1967 onwards do not include the adjustment on account of Balances held at treasuries.

Notes.—Comprise the notes issued by the Government of India upto April, 1935 and the Reserve Bank since then, less the notes held in the Banking Department of the Reserve Bank. They comprise therefore, the notes, held outside the Reserve Bank i.e. by the public banks, treasuries, etc. They include India notes in circulation outside the Indian Union but are net of Rs. 43 crores of India notes returned from Pakistan awaiting adjustment. They exclude the withdrawal of special currency issued and held outside India, particularly in the Persian Gulf area. They also include circulation of Hali Sicca Currency upto December, 1957.

Rupee coin.—Relates to quaternary rupees, nicket rupees, decimal rupee coins and Government of India one rupee notes which are treated as rupee coin. These also include Mahatma Gandhi Centenary Commemorative ten rupee silver coin from October, 1969, and World Food and Agriculture Organisation Commemorative. Ten Rupee silver coins from October, 1970. As in the case of notes, holdings in the Banking Department of the Reserve Bank are excluded, but rupee coin held by Government Treasuries as part of Treasury balances and those held by banks have been included. Figures are also net of an estimated amount of Rs. 15 crores of India Rupee Coin in circulation in Pakistan but are inclusive of circulation of Hali Sicca rupee coin upto December, 1957. Figures relates to last Friday of the period.

Small coins.—Data relate to the circulation of the various small coins mentioned in table 197. The circulation of small coins as presented in table 197 includes small coins held (i) in banks as part of cash on hand and (ii) at Government treasuries from April, 1962, but do not include those held (i) in the Banking Department of the Reserve Bank of India, (ii) at small coin depots and (iii) at Government treasuries upto March, 1962.

Balances held at Treasuries.—Comprise cash balances of Central Covernment (including centrally administered areas) and all State Governments consisting of notes, rupee coin and small coins. These data relate to the end of the period.

Cash in hand with banks.—Relates to such holdings of Scheduled non-scheduled commercial banks, State Co-operative banks, and other Co-operative banks (from 1970-71 onwards.)

Bank. Net demand deposits of banks comprise (i) in the case of scheduled commercial banks, non-bank demand deposits and non-deposit 'Other' liabilities upto 1959-60 and non-banks demand deposits only thereafter, (ii) in the case of non-scheduled commercial banks, non-bank demand deposits, and (iii) in respect of State Co-operative banks, net demand liabilities (non-bank demand deposits plus inter-bank deposits plus non-deposit other liabilities). From November 1960, net demand deposit, of scheduled commercial banks are directly available. The data prior to November, 1960 have been estimated by using monthly returns submitted in Form XIII (now Form XII) by banks under the Banking Companies Act, 1949 (now Banking Regulation Act, 1949) where inter-bank demand deposits are separately available. Other deposits with Reserve Bank.—Include all miscellaneous items such as deposits of quasi-government institutions, amount of cheques in course of collection, balances of foreign central banks and Governments, the International Monetary Fund (Account No. 2) and the International Bank for Reconstruction and Development but exclude (i) balances held on IMF Account No. 1 as the account is not intended to be currently drawn upon, (ii) Reserve Bank of India Employees' Provident Fund, Pension Fund and Co-operative Guarantee Fund; and (iii) Some extraordinary items.

31. CRIME STATISTICS

This section includes tables providing statistics of crimes in India. The statistics are collected by the Bureau of Police Research & Development, Ministry of Home Affairs from the Police Authorities of the State Governments. All India information relates to the sum-total of available data of States only and is, therefore, subject to revision.

Table 201

This table presents the incidence of IPC crimes under important heads of crime. The incidence of theft includes cattle theft and ordinary theft. The incidence shown under 'other' includes kidnapping and abduction, criminal breach of trust, cheating, counter-feiting and miscellaneous crimes.

Tables 202 & 203

These tables provide statistics of cognizable crimes classified by cases and by persons separately.

Table 204

This table gives information relating to 'Recidivism-total cognizable crime'.

Table 205

Information relating to value of property stolen and recovered is given in this table.

Tables 206 to 211

These tables present data relating to Juvenile delinquency in India.

Table 212

Information relating to number of persons arrested under important heads of crime and classified according to sex, is given in this table.

· Table 213

This table presents number of cases reported due to various motives of murder and culpable homicide not amounting to murder.

Tables 214 & 215

The actual strength, both armed and civil police, as on 31 st December of the year stated, under different ranks, is furnished in table 214. The information relating to civil police also includes district armed reserved police. Table 215 gives information relating to area and number of persons served by police force.

32. ACCIDENT STATISTICS

This section presents tables relating to accidental deaths and suicides in India. The source for these data is the Bureau of Police Research & Development, Ministry of Home Affairs, which obtain the information from Police Authorities in different States. All-India information relates to the available States only and is, therefore, subject to revision.

Table 216

This table shows the incidence of accidental deaths in different States, Union Territories and important cities. The causes of accidents have been classified into two broad categories viz. (i) Accidents due to acts of God such as lightning, heat strokes, landslides, etc. and (ii) Accidents due to other causes such as mishaps in factories, aircrashes, railway accidents, etc.

Table 217

This table presents statistics of suicidal deaths classified according to sex and age-group and also by causes of suicides. Among the causes of suicides, despair due to dreadful diseases, quarrel between married partners and with parents-in-law, and love-affairs, are some of the major causes.

33. EDUCATION

The academic year for the tables in this section is taken to coincide with the financial year ending 31st March.

Table 218

This is a summary table giving data regarding educational institutions, scholars and expenditure on education. Thus this table gives a general idea of the educational development in the country from 1950-51 onwards. Direct expenditure means expenditure directly connected with the maintenance of an institution viz. salary of teachers and other recurring expenditure. Direct expenditure means all expenditure on inspection, direction, buildings, furniture, scholarships and other miscellaneous items. Its nature is such that it cannot be apportioned to each type of institution.

Table 219

This table shows the number of recognised educational institutions by various types. Table 220

This table gives number of scholars by stages of instruction broadly categorised as below:

- (i) Colleges for General education.
- (ii) Colleges for Professional and Special education.
- (iii) Schools for General education.
- (iv) Schools for Vocational/professional education.
- (v) Schools for Special education.
- (vi) Schools for Other education.

Special education includes mainly reformatory schools, schools for handicapped and jail schools. Institutions of fine art including music and dancing and social work which were formerly included under special Education have, from 1964-65, have been included under Professional Education. Institutions of Adult education and oriental studies have been included under Other Education.

Table 221

This table shows the number of institutions and scholars in rural areas i.e. the areas outside the limits of municipal, cantonment, notified and small-town committees.

This table gives the expenditure on educational institutions by sources from which the finances are drawn. The sources of finances are mainly Government funds, District Board funds, Municipal funds, fees and endowments, etc. Incalculating the expenditure from Government, District or Municipal Board funds, all payments or contributions from fees or other sources, which are credited to these funds are deducted.

Table 223

This table shows direct expenditure by type of educational Institutions and indirect expenditure on all educational institutions. Indirect expenditure represents the amount incurred on direction, inspection, buildings, furniture, scholarships, hostels and other miscellaneous items.

Table 224

This table shows the number of total and women teachers engaged in teaching at different stages of education in recognised institutions, viz. primary, secondary and also in technical and special schools and in colleges and universities. Teachers in schools for general education are classified as trained and untrained.

Table 225

This table shows the progress of educational facilities to scheduled castes, and scheduled tribes. The number of pupils shown here inclusive of those reading in institutions meant for all communities. The number of pupils given in this table are also covered in earlier tables.

Table 226

This table shows the total literate population and literacy rate in India, according to sex as recorded in 1971 Population Census.

⁽¹⁾ Includes Post Basic, Higher Secondary, High, Senior Basic and Middle schools.

⁽a) Includes Junior Basic, Basic Primary, Single teachers Primary & Primary Others.

⁽³⁾ Includes Universities & Boards of examinations.

⁽a) Owing to the grouped presentation of data on schools for Vocational Professional and other Education, since 1964-65 by Ministry of Education, detailed break up on schools such as Teacher's Training Medicine and Veterinary Science, Handicapped and Adult (Social) Education, etc. has to be discounted. Details for the years upto 1960-61 are, however, available in the earlier issues of the abstract.

34. NEWSPAPERS AND PERIODICALS

Tables 227 to 229:-

This section presents information in respect of newspapers and periodicals which is based on the data collected under the authority of the Press and Registration of Books Act and are available in the Annual Report of the Registrar of Newspapers for India, Press in India. The definitions of the terms used in the tables in this section are given below:—

Newspaper: . . . Newspaper means any printed (including cyclostyled) periodical work containing public news or comments

on public news.

Periodical: . . . A newspaper appearing at an interval of a week or

more.

Other Periodical . Periodicals other than daily, tri-weekly, bi-weekly,

weekly, fortnightly, monthly, quarterly and annual.

Periodicity: Time gap between two issues of newspaper (daily,

weekly, fortnightly, monthly, etc.).

Daily: . . A newspaper issued at least four times a week.

Circulations: . . . Average number of copies sold and distributed free

per publishing day.

Other languages: . . Languages other than the printed languages included

in the 8th schedule of the Constitution of India.

Ministry of Information & Broadcasting.

Available information concerning public health statistics in India, is shown in the tables under this section. Data in greater detail are published by Ministry of Health & Family Welfare, Government of India and the various state authorities in the form of periodical reports. The information reates to all states of the Indian Union, unless otherwise specified. The figures for the latest available year are shown in greater detail. Corresponding figures for the earlier years are shown in totals only.

Table 230

This table shows the number of hospitals and dispensaries together with the number of patients treated indoor and outdoor and the number of beds available.

Table 231

This table gives the actual number of medical practitioners in Allopathy, registered with the Medical Councils in the states. Information relating to states where there are no Medical Councils has not been included.

Table 232

This table gives the actual number of nursing personnel registered with Nursing Councils or Boards, according to different categories.

Table 233

Number of patients treated and the number of deaths in hospitals by disease for different states are given in this table. The classification of diseases has been brought into conformity with the International Classification since 1956. The number of patients treated relates to both indoor, and outdoor. The number of deaths relates to indoor patients only.

Table 234

Data concerning mental hospitals (state-wise) are shown in this table. For the column on patients discharged, only total number is given and the break-up by cured and otherwise are not shown. But a column showing number of beds is given.

Table 235

The figures of Family Welfare Statistics given in the table are based on the information received from the various States/Union Territories and as compiled by the Department of Family Welfare. While working out the rates per thousand population by methods, the mid-year population has been estimated in the light of 1971 census figures and has been used here. The sterilisation figures for 1976-77 are higher as compared to previous years due to special efforts, made through Mass Vasectomy Camps in some of the States.

Number of conventional contraceptives users is worked out by dividing the off-take of contraceptives by the average number necessary for a couple for use in any year (Condoms: 72, Diaphragm. 2 Jelly/Cream Tubes: 7 and Foam Tablets 72).

⁽b) Relates to other methods from 1975-76 on wards. Other methods include conventional contraceptives and oral pills.

36. HOUSING

This section contains information on housing in India. Tables 236 and 240 are based on data collected in the National Buildings Organisation, Ministry of Works & Housing. Table 237 is based on National Sample Survey, 22nd round (July 1967—June 1968), Report No. 171 and 23rd round (July 1968—June 1969), Table 239 is based on NSS 18th round (February '63—Jan., '64) Report No. 170 and 15th round (July '59—June 1960). Report No. 146 issued by the Department of Statistics, Government of India. Table 238 is based on data collected at the house listing operation of the Population Census of India, 1971 and National Sample Survey 19th round (July 1964—June 1965) Report No. 195.

Table 236(a) and 236(b)

These tables give data on 'Investment in residential and non-residential buildings' during 1974-75 by various Central and State Public Sector Agencies including Public Undertakings for each State and Union Territory. Table 236(a) gives data on projects completed and table 236(b) on projects under execution during 1974-75.

The data relate to 67 Divisions out of 71 construction divisions of C.P.W.D. 79 Central Public Sector Undertakings including nationalised banks, RBI and Port Trusts, etc. 3 manufacturing units and all the zonal railways excepting the Western railway. The coverage in M.E.S. was about fourfifth and in P.&T. about one-half. In regard to state sector, data relate to twelve states, namely, Assam, Bihar, Jammu & Kashmir, Karnataka, Kerala, Madnya Pradesh, Maharashtra, Manipur, Nagaland, Orissa, Punjab and Tamil Nadu and all the Union Territories except Andaman & Nicobar Islands, Lakshadweep and Mizoram.

The data for Arunachal Pradesh are shown under CPWD as building construction there is undertaken by the CPWD on behalf of the Union Territory.

Railways and some other Central Agencies do not provide statewise break-up of the investment on construction and therefore the total investment by these agencies is shown separately under the head 'Buildings by other agencies.

Table 237

The table presents for each State and Union Territory the construction rate of dwellings of different types 'completed' during 1974-75 and 'in progress' at the end of 1974-75 for various Central and State Public Sector Agencies including Public Undertakings. The coverage of data is the same as in table 236(a) and 236(b).

Table 238

The table presents for each State and Union Territory the construction rate of estimated number of pucca houses completed per thousand of rural population according to size of the village.

A pucca house is one whose walls and roof are at least made either of oven-burnt bricks, stone, cement, concrete or timber. Tiles, galvanised iron and/or asbestos cement used in the construction of roof were regarded as pucca materials. In some states, such materials as cement plastered reeds, called jack board are used for construction of wall, roof etc. These materials were also regarded as pucca materials.

The table is based on data collected by the National Sample Survey Organisation in its 22nd and 23rd round in NBO's sponsored scheme on 'Survey of dwellings in rural areas'

Table 239

The table provides number and average size of households, number of dwellings, number of rooms per household, distribution of households according to the size of

HOUSING 587

dwellings and number of persons per room. This table is based on 20% sample of the data collected at the house listing operation of 1971 census. The density of occupation has been based on the National Sample Survey Report No. 195 (July '64—June '65).

Table 240

The table gives data about housing condition and amenities available to urban and rural households and condition of structure, age of structure, facilities of piped water, electricity, bathroom and toilet. The table is based on data collected by National Sample Survey in fifteenth and eighteenth Rounds, for age of structure and bathroom facilities and twenty eighth round for others

Table 241

The table indicates number of building permits and completion certificates issued in municipal areas in the private sector. The series have been built up from 1961 onwards. For the years 1961 and 1964 to 1970, data relate to private construction in municipal towns with population of 75,000 and above as per 1961 census. From 1971 onwards, data relate to all municipal towns with population of 1,00,000 and above as per 1971 census. For the towns for which data were not available, the number of building permits/completion certificates issued have been estimated by applying the average rate of the last three years relating to the concerned state.

Source: National Buildings Organisation, Ministry of Works & Housing.

Notes:—1. Upto the end of year 1970, data relate to private construction in municipal towns with population of 75,000 and above as per 1961 census. From 1971, the data is pertaining to all municipal towns with population of 1,00,000 and above as per 1971 census.

^{2.} There is no major town coming under the coverage given above in Himachal Pradesh, Mcghalaya, Nagaland, Tripura, A. & N. Islands, Arunachal Pradesh. Dadra & Nagar Haveli, Goa, Daman & Diu, Lakshadweep Mizoram and Pondicherry. Hence these States/Union Territories are not included in the above Table.

^{3.} Estimates are based on replies to a main questionnaire issued to the Municipalities. In case of non-responding municipalities, estimates have been arrived at by applying the average rate for the last three years relating to the concerned state.

(†) For 1961 to 1965, data for Haryana and Chandigarh are included in Punjah.

The term 'Local Bodies' refers to such institutions of the Government which carry on the local affairs viz,. Corporations, Municipalities, Notified Area Committees, Town Area Committees, District Boards, Panchayats etc. This section, however, presents data regarding income and expenditure of Municipal Corporations only. The information has been supplied by the individual Corporations.

Municipal Corporations are relatively the most developed form of Local Self Government and have generally been established in metropolitan areas or big cities. By and large these have been constituted under specific legislative enactment. With the growth of cities, Corporations have been established in number of towns. They have wider powers and they enjoy more autonomy than the other local bodies. The chief executive authority of a Corporation is the Commissioner who is independent of the elected body. The Corporation elects its Mayor and Deputy Mayor out of the elected members.

Table 242

This table provides data regarding income of Municipal Corporations by financial resources, namely (i) tax revenue and (ii) non-tax revenue. The tax revenue by and large consists of the taxes on—

- (i) Property
- (ii) Service
- (iii) Octroi
- (iv) Terminal
- (v) Trade & callings
- (vi) Animals and vehicles
- (vii) Toll
- (viii) Miscellaneous.

The Non-tax revenue generally comprises the following items:

- (i) Government grants
- (ii) Rents from municipal properties
- (iii) Revenue from municipal utilities and undertakings
- (iv) Licence and various other fees including those from municipal institutions
- (v) Interest on municipal investments and
- (vi) Fines.

Table 243

This table presents data about the expenditure of the Municipal Corporations which generally comprises the following items :

- (i) General Administration & Collection of Revenue
- (ii) Public Health
- (iii) Safety and Convenience
- (iv) Education
- (v) Public Works
- (vi) Miscellaneous.

Table 244

This table gives the number of Panchayats, Panchayat Samities, Zilla Parishads and Villages covered under Panchayati Raj as on 31st March of the year stated. The rural population covered by these local bodies has also been shown.

Table 245

In this table data on number of C.D. blocks allotted and their coverage are given as on and April of the year stated.

38. ELECTORAL STATISTICS

This section provides results of the election to both Houses of the Parliament and to the State Assemblies and Councils, bringing out broadly the salient characteristics of the electorates in the country.

Under the Indian Constitution there shall be a Parliament for the Union consisting of the President and two houses to be known respectively as the Council of States (Rajya Sabha) and the House of People (Lok Sabha). Similarly in each State there shall be a legislature consisting of either one House known as the Legislative Assembly (Vidhan Sabha) or two houses known as the Legislative Council (Vidhan Parishad) and the Legislative Assembly (Vidhan Sabha). The election to the House of People and to the Legislative Assemblies of every State shall be on the basis of adult suffrage; that is to say every person who is a citizen of India and has attained the age of 21 years, if not otherwise disqualified, shall be entitled to be a voter at any such election.

The Legislative Assembly of each State is to be composed of members chosen by direct election. The total number of members in the Legislative Assembly of a State shall not in any case be more than 500 or less than 60. The strength of the electoral college of the Union Territories is laid down in the provisions of the Representation of the People Act, 1950.

Representation in the Legislative Council of each State, where there is such a Council will be confined to Local Authorities, University Graduates and Teachers, Nominees of the Governor and elected representatives of the Legislative Assembly.

Tables 246-247

These two tables show the number of voters and seats in each State for the purpose of election to the House of People and the Legislative Assemblies respectively.

In these two tables, Col. 3 shows total number of electors (Voters) in all constituencies whereas Col. 4 shows the number of votes polled. The percentage of votes polled to total votes in contested constituencies is shown in Col. 6. This indicates the extent to which the voters exercised their franchise. The difference between "votes polled" and valid "votes polled" shows the number of votes which were polled either wrongly or were rejected.

Table 248

This table shows the number of seats in the Legislative Council and the number of constituencies in the State Legislative Assembly for the purpose of the election.

ELECTORAL STATISTICS

DV--Votes in contested constituencies including two/three votes for each elector in two/three member constituencies. CE-Electors in the contested constituencies only.

- CE—Electors in the contested constituencies.

 (a) The first General Election in the country was held from October, 1951 to March, 1952. At that time there were three types of constituencies. Single member, two member and three member. No. of votes polled are not available for General Election, 1952, and as such No. of valid votes have been indicated in column (4).

 (b) In the second General Election, there were two types of constituencies—Single member and two member. The figure 123, 461, 815 includes number of votes polled in two

member constituencies.

(c) In the third and fourth General Elections. all constituencies are single member.

(d) Excluding one seat for North East Frontier Tract filled by nomination.

(e) According to the Punjab Re-organisation Act, 1966 the State of Punjab and the Union Territory of Himachal Pradesh were re-organised on 1-J1-66 into states of Haryan and Punjab and the Union Territories of Chandigarh and Himachal Pradesh.

(f) Re-organised into state w.e.f. 25-1-71 and No. of seats have been reduced from 6 to 4.

Table 248—Number of Seats and Constituencies in the Vidhan Parishads—Contd. (State Legislative Councils)

Notes :

- C-Constituencies; S-Seats. Figures in brackets in column 3 indicate the number of Legislative Councils
- (1) Elections were conducted from October 1951 to March, 1952 on the basis of the seats allocated under Section 10 and the Third Schedule of the Representation of the People Act, 1950. The Council constituencies were delimited under the Delimitation of Council Constituencies Orders, 1951, as modified by the Parliament.
- (2) Seats and Constituencies for Madras were modified under Section 19 of the Andhra State Act, 1953 (30 of 1953) (16-9-1953).
- (3) Under Section 19(1)(c) of the Andhra State Act, 1953 w.e.f. 21-4-1954, seats for Graduates Constituencies in Madras increased from 4 to 6 and those filled by nomination by the Governor reduced from 11 to 9, keeping the total seats same i.e. 51.
 - (4) Seats and Constituencies in Madras were modified by the Adoptation of Laws Order, 1956 (No. 3).
 - (5)(i)Seats in Mysore were modified under Section 30(3) of the States Reorganisation Act, 1956 (13 of 1956) (31-8-1956). Council Constituencies were to be delimited in Mysore under Section 36(4) of the Act by the Election Commission.
 - (ii) 1956 Total excludes figures for legislative Council of Madhya Pradesh which was to be constituted from such date as the President may by order appoint having the same number of seats i.e. 72. Such Council has not been constituted.
 - (iii) Council Constituencies were also to be delimited by the Election Commission for the reorganised State of Bombay Madhya Pradesh and Punjab.
- (6) Seats and Constituencies modified for all States including Madnya Pradesh by the Legislative Council Act, 1957 (37 of 1957) (3-12-1957).
 - (7) (i) 1958 Total excludes figures for Madhya Pradesh, where Legislative Council has not yet been constituted.
 - (ii) Reference date to administrative Units in Madhya Pradesh changed to 1-i0-1959 vide Section 5 and Schedule II of the Rajasthan and Madhya Pradesh (Transfer of Territories) Act, 1959 (47 of 1959).
- (8) Seats and Constituencies for Maharashtra modified by Section 22 and Schedule V of the Bombay Reorganisation Act, 1960 (11 of 1960) (1-5-1960).
- (9) Constituencies modified by the Delimitation of Council Constituencies Amendment Order, 1961 for Andhra Pradesh (GSR-1181), Binar (GSR-1182), Maharashtra (GSR-1183) and West Bengal (GSR-1184).
- (10) Constituencies modified by the Delimitation of Council Constituencies Amendment Order, 1961 for Madras (GSR-567), Mysore (GSR-568) and Punjab (GSR-569).
- (11) Constituencies modified by the Delimitation of Council Constituencies (Uttar Pradesh) Amendment Order, 1961 (GSR-1273).
- (12) Reference date to administrative units changed to 1-4-1965 on 25-7-1965 for Andhra Pradesh (GSR-1057), Bihar (GSR-1058), Maharashtra (GSR-1059), Madras (GSR-1060), Mysore (GSR-1061), Punjab (GSR-1062), Uttar Pradesh (GSR-1063) and West Bengai (GSR-1064).
 - (13) Reference date to administrative units changed to 1-1-1966 in Madras vide GSR-1097 dated 18-7-1966.
- (i4) Name of Bangalore district substituted as 'Bangalore' (Urban) and Bangalore (Rural) districts vide GSR-421 dated 5-6-1964.
- (15) Seats and Constituencies substituted by Section 20 and 21 of the Punjab Reorganisation Act, 1966 (31 of 1966) (18-9-1966).
- (16) Number of Local Authorities Constituencies increased from 23 to 28 in Uttar Pradesh vide the Delimitation of Council Constituencies (Uttar Pradesh) Amendment Order, 1956-GSR 589(E) dated 13-1-1966.
- (17) Legislative Council of Punjab was abolished by Section 5 of the Punjab Legislative Council (Abolition) Act, 1969 (46 of 1969) (w.e.f. 7-1-1970).
- (18) Legislative Council of West Bengal was abolished by Section 5 of the West Bengal Legislative Council (Abolition) Act, 1959 (20 of 1969) (w.e.f. 1-8-1969).
- (19) Figures for 1970 and 1972 excludes figures for the Legislative Councils of Punjab and West Bengal which were abo ished on 7-1-1970 and 1-8-1969 respectively.
 - (20) Reference date to administrative units changed to 1-10-1971 in Bihar vide GSR (E) dated 30-12-1972.
- (21) The names of 'North Satara and South Satara district' in Maharashtra changed to 'Satara' and 'Sangli' vide GSR-1821 dated 22-10-1970.
 - (22) The names of 'Madras' changed to 'Tamil Nadu' on 14-1-1969 vide GSR-112 dated 13-1-1970.
 - (23) Reference date administrative units changed to 1-4-1970 for Uttar Pradesh vide GSR-968 dated 25-6-1970.
- (24) Number of Local Authorities Constituencies in Andhra Pradesh increased from 20 to 21 vide Delimitation of Council Constituencies (Andhra Pradesh) Amendment Order, 1973.
- (25) Number of Teachers Constituencies in Maharashtra were increased from 2 to 3 vide the Delimitation of Council Constituencies (Bombay) (Amendment) Order, 1974-GSR 249(E) dated 29-5-1974.
- (26) Reference to reorganised districts in Bihar as on 1-3-1975 incorporated vide the Delimitation of Council Constituencies (Bihar) Amendment Order, 1975-GSR 494(E) dated 16-9-1975.
 - (27) The name of 'Mysore' changed to 'Karnataka' vide GSR-431(E) dated 21-10-1974,
- (28) Number of Teachers Constituencies were increased in Maharashtra from 3 to 4 vide the Delimitation of Council Constituencies (Bombay) Amendment Order, 1975 vide GSR-389(E), dated 27-12-1975.
 - (29) Reference to reorganised districts as on 1-2-1974 made vide GSR-114(E) dated 2-3-1974.
 - (30) Reference to reorganised Divisions or districts as on 1-4-1970 made vide GSR-968 dated 25-6-1974.

Table 249

Plan outlay/Expenditure for Public Sector—Table 249A & B present figures of plan provision and outlay for first, second, third, fourth and fifth plan periods and also during the annual plans 1966-69. Table 249C, D and E provide the corresponding Statewise figures for the fifth plan 1974-79 and Annual Plans 1978-79 and 1974-78.

Table 250

Principal targets and achievements—It presents targets as well as achievements during first, second, third, fourth and fifth plan for about 85 items under the major heads (i) agricultural production; (ii) forests and soil conservation; (iii) community development; (iv) irrigation by crops; (v) power; (vi) mining; (vii) industrial production; (viii) mechanical, electrical engineering and chemical and allied industries; (ix) timber and food industries; (x) transport and communications; (xi) ports and harbours; (xii) posts and telegraphs; (xiii) social services (education); and (xiv) health.

Data for number of towns and villages electrified—item 28—relate to cumulative achievement upto the end of the period. The population-wise break-up of electrified towns and villages and other figures have been estimated wherever actual figures are not available.

The data for electrified villages for Tamil Nadu upto 31-3-1961 is as per 1951 Census and therefore the population-wise break-up for all periods upto March 1961 is estimated. The data for electrified villages for the States of Assam, Gujarat, Himachal Pradesh, Jammu & Kashmir, Karnataka, Manipur, Nagaland and Rajasthan as on 31-3-74, is as per 1971 census.
